

1. Record Nr.	UNINA9910958935903321
Titolo	Rheumatoid arthritis : prevalence, risk factors, and health effects // Michael H. Madsen, editor
Pubbl/distr/stampa	Hauppauge, NY, : Nova Science Publishers, c2011
ISBN	1-61122-286-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (202 p.)
Collana	Immunology and immune system disorders
Altri autori (Persone)	MadsenMichael H. <1960->
Disciplina	616.7/227
Soggetti	Rheumatoid arthritis Autoimmune diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Pathogenesis mechanism and cardiovascular risk factors for arteriosclerosis in rheumatoid arthritis : the importance and implications of early diagnosis / Alberto Lopez de Guzman ... [et al.] -- A review of neurobiomechanical changes in rheumatoid arthritis / Aparna Rajagopalan -- Hand involvement and its effects on quality of life in rheumatoid arthritis / Nilay Sahin, Hatice Ugurlu -- Relevance of genetic risk factors in rheumatoid arthritis / Jezabel Varade, Emilio Gomez de la Concha, Elena Urcelay -- Long-term results of computer-assisted cervical reconstruction for cervical disorders in rheumatoid arthritis / Jun Takahashi, Hiroyuki Kato -- The impact of rheumatic arthritis on sexual function / Antonio G. Tristano -- Role of T cells in human osteoclastogenesis-bone destruction of rheumatoid arthritis via cytokines from T cells / Shigeru Kotake ... [et al.] -- Subclinical atherosclerosis in patients with rheumatoid and psoriatic arthritis / Elisabetta Profumo.
Sommario/riassunto	Rheumatoid arthritis (RA) is a chronic inflammatory auto-immune disease characterised by progressive joint destruction resulting from chronic synovial inflammation. It leads to various degrees of disability, and ultimately has a profound impact on the social, economic, psychological, and sexual aspects of the patient's life. This book presents current research from across the globe in the study of rheumatoid arthritis, including the relevance of genetic risk factors in rheumatoid arthritis; cervical reconstruction for cervical disorders in

rheumatoid arthritis; sub-clinical atherosclerosis in patients with rheumatoid and psoriatic arthritis; and hand involvement and quality of life effects on patients with rheumatoid arthritis.
