Edizione	[1st ed.]
Descrizione fisica	xxii, 429 p. : ill
Altri autori (Persone)	AdlerNancy E PageAnn (Ann E. K.)
Disciplina	362.196/994
Soggetti	Cancer - Patients - Care - United States Cancer - Patients - Services for - United States Cancer - Social aspects - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Institute of Medicine of the National Academies."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Matter -- Reviewers -- Foreword -- Preface -- Acknowledgments -- Contents -- Tables, Figures, and Boxes -- Summary -- 1 The Psychosocial Needs of Cancer Patients -- 2 Consequences of Unmet Psychosocial Needs -- 3 Psychosocial Health Services -- 4 A Model for Delivering Psychosocial Health Services -- 5 Implementing the Standard of Care -- 6 Public- and Private-Sector Policy Support -- 7 Preparing the Workforce -- 8 A Research Agenda -- Appendixes -- Appendix A: Committee Member Biographies -- Appendix B: Study Methods -- Appendix C: Recommendations from Prior Selected Reports -- Index.
Sommario/riassunto	Cancer care today often provides state-of-the-science biomedical treatment, but fails to address the psychological and social

(psychosocial) problems associated with the illness. This failure can compromise the effectiveness of health care and thereby adversely affect the health of cancer patients. Psychological and social problems created or exacerbated by cancer--including depression and other emotional problems; lack of information or skills needed to manage the illness; lack of transportation or other resources; and disruptions in work, school, and family life--cause additional suffering, weaken adherence to prescribed treatments, and threaten patients' return to health. Today, it is not possible to deliver high-quality cancer care without using existing approaches, tools, and resources to address patients' psychosocial health needs. All patients with cancer and their families should expect and receive cancer care that ensures the provision of appropriate psychosocial health services. Cancer Care for the Whole Patient recommends actions that oncology providers, health policy makers, educators, health insurers, health planners, researchers and research sponsors, and consumer advocates should undertake to ensure that this standard is met.
