

1. Record Nr.	UNINA9910959185203321
Autore	Boucek Z
Titolo	Illustrated key to West-Palearctic genera of Pteromalidae (Hymenoptera: Chalcidoidea) / / Zdenek Boucek, Jean-Yves Rasplus
Pubbl/distr/stampa	Paris, : Institut National de la Recherche Agronomique, 1991
ISBN	9782759205233 2759205231
Edizione	[1st ed.]
Descrizione fisica	1 online resource (146 p.)
Collana	Techniques et pratiques
Altri autori (Persone)	RasplusJean-Yves
Soggetti	Pteromalidae - Identification Chalcid wasps - Europe Chalcid wasps - Africa, North Chalcid wasps - Middle East
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Running title: West-Palearctic Pteromalidae : key to genera.
Nota di bibliografia	Includes bibliographical references (p. 135-138) and index.
Nota di contenuto	""Synopsis""; ""Preface""; ""Acknowledgements""; ""Introduction""; ""Geographical limits""; ""State of research in the area""; ""Comments on systematics, names and the key""; ""Morphological terms""; ""Study of the pteromalid material""; ""Biology""; ""Pteromalidae and biological control""; ""Key to genera ""; ""Electronscan photographs""; ""New taxa and corrections of names""; ""New taxa""; ""Corrections (changes) of names""; ""References ""; ""Index to generic names""
Sommario/riassunto	Pteromalids develop as parasites of various stages of other insects or spiders. They are represented in the West-Palearctic region (Europe, North Africa and part of the Middle East) by 16 subfamilies, 221 genera with 10 subgenera, and probably more than 1 000 species. Therefore, they play a major role in agriculture, forestry and nature in general. However, knowledge of the group is rather poor and even identifications at the generic level are difficult. This book will provide teachers, students, workers in applied entomology, crop protection, plant quarantine, with a useful tool for assessment of the ecological value of Pteromalidae and of their potential for pest control.
