Sommario/riassunto	According to the National Multiple Sclerosis Society, 15% of MS patients are diagnosed with the progressive form of the disease and experience symptoms such as tremor, poor coordination, difficulty walking, and other problems from the start. While an additional 50%, of those diagnosed with relapsing-remitting MS, will develop progressive MS within 10 years. Living with Multiple Sclerosis: Overcoming the Challenges, 2nd Edition is written for people who have been diagnosed with the progressive form of multiple sclerosis. It focuses on the newest advances in managing worsening symptoms and offer
