Sommario/riassunto	Being laid off can be a traumatic event. The unemployed worry about how they will pay their bills and find a new job. In the American economy's boom-and-bust business cycle since the 1980's, repeated layoffs have become part of working life. In A Company of One, Carrie M. Lane finds that the new culture of corporate employment, changes to the job search process, and dual-income marriage have reshaped how today's skilled workers view unemployment. Through interviews with seventy-five unemployed and underemployed high-tech white-collar workers in the Dallas area over the course of the 2000's, Lane shows that they have embraced a new definition of employment in which all jobs are temporary and all workers are, or should be, independent "companies of one. "Following the experiences of individual jobseekers over time, Lane explores the central role that organized networking events, working spouses, and neoliberal ideology play in forging and reinforcing a new individualist, pro-market response to the increasingly insecure nature of contemporary

employment. She also explores how this new perspective is transforming traditional ideas about masculinity and the role of men as breadwinners. Sympathetic to the benefits that this "company of one" ideology can hold for its adherents, Lane also details how it hides the true costs of an insecure workforce and makes collective and political responses to job loss and downward mobility unlikely.

## Sommario/riassunto

In this extraordinary introduction to the study of the philosophy of technology, Andrew Feenberg argues that technological design is central to the social and political structure of modern societies. Environmentalism, information technology, and medical advances testify to technology's crucial importance. In his lucid and engaging style, Feenberg shows that technology is the medium of daily life. Every major technical change reverberates at countless levels: economic, political, and cultural. If we continue to see the social and technical domains as being separate, then we are essentially
