

1. Record Nr.	UNINA9910959490803321
Autore	Ginzburg V. L (Vitalii Lazarevich), <1916-2009.>
Titolo	Superconductivity // V.L. Ginzburg, E.A. Andryushin
Pubbl/distr/stampa	New Jersey ; ; Hong Kong, : World Scientific, c2004
ISBN	9786611872137 9781281872135 128187213X 9781417586684 1417586680 9789812562111 9812562117
Edizione	[Rev. ed.]
Descrizione fisica	1 online resource (105 p.)
Classificazione	33.74
Altri autori (Persone)	AndriushinE. A. <1951->
Disciplina	537.623
Soggetti	Superconductivity Electric conductivity
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 91-92).
Nota di contenuto	Superconductivity; To the Reader; Preface to the Revised Edition; Contents; 1 The Discovery of Superconductivity; 2 Physics of Superconductivity; 3 The Nature of Superconductivity; 4 Applications of Superconductivity; 5 The Superconducting Boom; References
Sommario/riassunto	What is superconductivity? How was it discovered? What are the properties of superconductors, how are they applied now, and how are they likely to become widely used in the near future? These are just some of the questions which this important book sets out to answer. Starting with the discovery of superconductivity over ninety years ago, the book guides the readers through the many years of subsequent exploration, right up to the latest sensational findings. Written in a lively, nontechnical style, this book makes ideal background reading for any school or college level study of superconducti
