Sommario/riassunto	The relationship between migration, development and remittances in Lesotho has been exhaustively studied for the period up to 1990. This was an era when the vast majority of migrants from Lesotho were young men working on the South African gold mines and over 50 percent of households had a migrant mineworker. Since 1990, patterns of migration to South Africa have changed dramatically. The reconfiguration of migration between the two countries has had a marked impact on remittance flows to Lesotho. The central question addressed in this report is how the change in patterns of migration from and
