   Sommario/riassunto   <EM>Regional Policy and Planning in Europe</EM> explores the ways regional policy and planning systems across Europe have been influenced by:
* economic and monetary union
* the impending enlargement of the European Union
* the devolution of administrative power from central government to regional authorities
* the increased importance of environmental and urban

issues.
Presenting a comprehensive overview of the economic basis of integration, this book examines the evolution of various systems of government, planning and forms of devolution.

Sommario/riassunto	This book explores the origin and evolution of important grammatical categories of the Indo-European verb, including the markers of person, tense, number, aspect, and mood. Its central thesis is that many of these markers can be traced to original deictic particles which were incorporated into verbal structures in order to indicate the 'hic and nunc' and various degrees of remoteness from the 'hic and nunc'. The alterations to which these deictic elements were subject are viewed here in the context of an Indo-European language very different from Brugmannian Indo-European, many features of
