

1. Record Nr.	UNINA9910959592603321
Autore	Arnold Eckhart
Titolo	Explaining altruism : a simulation-based approach and its limits // Eckhart Arnold
Pubbl/distr/stampa	Frankfurt, : Ontos Verlag, 2008
ISBN	3-86838-007-8 3-11-032757-0
Descrizione fisica	1 online resource (315 p.)
Collana	Practical Philosophy ; ; 11 Practical philosophy ; ; Bd. 11
Disciplina	171.8
Soggetti	Altruism - Computer simulation Cooperativeness - Computer simulation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Chapter 1: Introduction -- Chapter 2: The riddle of altruism -- Chapter 3: The generalized theory of evolution as theoretical framework -- Chapter 4: Modeling the evolution of altruism -- Chapter 5: Empirical research on the evolution of altruism -- Chapter 6: Learning from failure -- Chapter 7: Summary and final reflections -- Chapter 8: Appendices -- Backmatter
Sommario/riassunto	Employing computer simulations for the study of the evolution of altruism has been popular since Axelrod's book „The Evolution of Cooperation“. But have the myriads of simulation studies that followed in Axelrod's footsteps really increased our knowledge about the evolution of altruism or cooperation? This book examines in detail the working mechanisms of simulation based evolutionary explanations of altruism. It shows that the „theoretical insights“ that can be derived from simulation studies are often quite arbitrary and of little use for the empirical research. In the final chapter of the book, therefore, a set of epistemological requirements for computer simulations is proposed and recommendations for the proper research design of simulation studies are made.
