

1. Record Nr.	UNINA9910959627703321
Titolo	Research on evolution equations compendium . Volume 1 // Gaston M. N'Guerekata (editor)
Pubbl/distr/stampa	New York, : Nova Science Publishers, 2009
ISBN	1-61209-404-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (438 p.)
Collana	v. 2: Evolution equations research Research on evolution equations compendium
Altri autori (Persone)	N'GuerekataGaston M. <1953->
Disciplina	515/.353
Soggetti	Evolution equations Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- RESEARCH ON EVOLUTION EQUATIONS COMPENDIUM VOLUME 1 -- RESEARCH ON EVOLUTION EQUATIONS COMPENDIUM VOLUME 1 -- CONTENTS -- PREFACE -- Chapter1DOUBLESCALECONVERGENCEANDHOMOGENIZATIONOFQUASILINEARPARABOLICEQUATIONS -- Abstract -- 1.Introduction -- 2. FormulationoftheProblem -- 3. DoubleScaleConvergenceandtheMainTheorem -- References -- Chapter2SECONDGRADEFLUIDSWITHENHANCEDVISCOSITYASDYNAMICALLSYSTEMS -- Abstract -- 1.Introduction -- 2.SettingoftheProblem -- 3. ExistenceoftheGlobalAttractor -- 4.ExistenceofExponentialAttractors -- Acknowledgments -- References -- Chapter3PERIODICSOLUTIONSOF SOME E EVOLUTIONEQUATIONSWITHINFINITEDELAY -- Abstract -- 1.Introduction -- 2. SolutionsandTheirEstimations -- 3.ExistenceofPeriodicSolutions -- 4. AMasseraTypeTheorem -- References -- Chapter4INTERNALPOLLUTIONANDDISCRIMINATINGSENTINELINPOPULATIONDYNAMICS PROBLEM -- Abstract -- 1.Introduction -- 1.1. PopulationDynamicsProblemwithMissingData -- 1.2.EquivalencetoNull-ControllabilitywithConstraintsontheControl -- 1.3. ControllabilityProblem -- 2.Null-ControllabilitywithConstraintsontheControl -- 2.1. ObservabilityInequalityAdaptedtoConstraints -- 2.2.

Existence of Optimal Control Variable -- 3.
Optimality System for the Optimal Control Variable -- 4.
Discriminating Sentinels -- 5. Conclusion -- Acknowledgments --
References --
Chapter 5 CENTER MANIFOLD AND STABILITY IN CRITICAL CASES FOR SOME PARTIAL FUNCTIONAL DIFFERENTIAL EQUATIONS -- Abstract -- 1.
Introduction -- 2. Spectral Analysis and Variation of Constants Formula --
3. Global Existence of the Center Manifold -- 4.
Attractiveness of the Center Manifold -- 5. Flow on the Center Manifold -- 6.
Stability in Critical Cases -- 7. Local Existence of the Center Manifold -- 8.
Application -- Acknowledgments -- References --
Chapter 6 STABILITY RADIUS OF POSITIVE LINEAR FUNCTIONAL DIFFERENTIAL SYSTEMS IN BANACH SPACES -- Abstract -- 1. Introduction -- 2.
Preliminaries.
3.
Stability Radius of Linear Abstract Functional Differential Equations under Multi-perturbations -- 3.1. Abstract Functional Differential Equations -- 3.2.
Stability Radius -- 4.
Stability Radius of Positive Linear Functional Differential Equations under Multi-affine Perturbations -- References --
Chapter 7 EFFECTS OF NONLOCALITY AND PHASE SHIFT DEFINITIONS IN GENERALIZING LEVINSON'S THEOREM -- Abstract -- 1. Introduction -- 2.
Method of Approach -- 3. Extension to Nonlocal Potentials -- 4.
Properties of $D^+(k)$, $D(k)$, and $L^+(k)$ for a Nonlocal Potential -- 5.
Solutions at $k=0$ -- 6.
Derivation of the Generalized Levinson's Theorem for the Phase Shift -- 6.1.
Case of n Bound States and One Half-Bound State -- 6.2.
Case of n Bound States and m Continuum Bound States -- 6.3.
Case of n Bound States and p Spurious States -- 6.4. Summary -- 7.
Derivation of the Generalized Levinson's Theorem for the Phase Shift -- 7.1.
Case of n Bound States and One Half-Bound State -- 7.2.
Case of n Bound States and m Continuum Bound States -- 7.3.
Case of n Bound States and p Spurious States -- 7.4. Summary -- 8.
Examples -- 8.1. Yamaguchi Potential -- 8.1.1.
Phase Shift Calculation Using L -- 8.1.2. Phase Shift Calculation Using D --
8.2. Beregi Potential -- 8.2.1. Phase Shift Calculation Using $L(k)$ -- 8.2.2.
Phase Shift Calculation Using L -- 9. Summary and Conclusion --
References -- Chapter 8 ASYMPTOTIC BEHAVIOR OF THE FITZTHUGH-NAGUMO SYSTEM -- Abstract -- 1. Introduction -- 2. Main Results -- 3.
A Semigroup Associated with Problem (2.1)-(2.3) -- 4.
Uniform Estimates in Time -- 5. Existence of Global Attractors -- 6.
Uniform Bounds of Global Attractors in -- 7.
Compactness of the Union of Global Attractors -- 8.
Upper Semicontinuity of Global Attractors -- References --
Chapter 9 A PARTIAL DIFFERENTIAL EQUATION WITH NONAUTONOMOUS PAST DELAY IN L^1 -PHASE SPACE -- Abstract -- 1. Introduction -- 2.
Preliminaries -- 3.
Wellposedness of Partial Differential Equations with Nonautonomous Past Delay -- 4.
Asymptotic Behaviour of Partial Differential Equations with Nonautonomous Past Delay -- 5. Application.
5.1.
The Population Equation as an Abstract Equation with Nonautonomous Past Delay -- 5.2.
Wellposedness and Asymptotic Behavior of the Population Equation --
References --
Chapter 10 SOLVING THE HYPERBOLIC PROBLEM OBTAINED BY TRANSMUTATION OPERATOR -- Abstract -- 1. Introduction -- 2.

Existence of the Transmutation Operator -- 3. Riemann Method --
References --
Chapter 11 ELLIPTIC OPERATORS WITH VARIABLE COEFFICIENTS GENERATING FRACTIONAL RESOLVENT FAMILIES -- Abstract -- Introduction -- 1. Preliminaries on Fractional Resolvent Families -- 2. Elliptic Differential Operators on L^2 -- References --
Chapter 12 EXISTENCE RESULTS FOR PSEUDOALMOST PERIODIC DIFFERENTIAL, FUNCTIONAL, AND NEUTRAL INTEGRAL EQUATIONS -- Abstract -- 1. Introduction -- 2. Preliminaries -- 2.1. Pseudo Almost Periodic Functions -- 2.2. The Zima's Fixed-Point Theorem -- 3. Pseudo Almost Periodic Solutions -- 3.1. Pseudo Almost Periodic Solutions to Eq.(1.1) -- 3.2. Pseudo Almost Periodic Solutions to Eq.(1.2) -- 4. Pseudo Almost Periodic Solutions to Some Partial Evolution Equations -- 4.1. Pseudo Almost Periodic Solutions to Eq.(1.3) -- 4.2. Pseudo Almost Periodic Solutions to Eq.(1.4) -- 5. Case of the Logistic Equation with Delay -- References --
Chapter 13 AN ASYMPTOTIC MODEL OF A NONLINEAR KELVIN-VOIGT VISCOELASTIC PLATE -- Abstract -- 1. Introduction -- 2. Set-up of the Problem -- 3. Scaling of Unknowns -- References --
Chapter 14 MATHEMATICAL ANALYSIS OF A BILATERAL OBSTACLE PROBLEM FOR A CLASS OF SECOND-ORDER OPERATORS -- Abstract -- 1. Introduction -- 1.1. Mathematical Framework -- 1.2. Main Notations and Assumptions on Data -- 1.3. Two Concepts of Weak Solutions -- 2. The Uniqueness Theorem -- 3. The Viscosity and Penalization Methods -- 3.1. Some a priori Estimates -- 3.2. Convergence toward an Entropy Process Solution -- References --
Chapter 15 APPLICATION OF THE PICARD OPERATOR TO SECOND ORDERODE'S -- Abstract -- 1. Introduction -- 2. Preliminaries -- 3. The Main Result -- 4. Application -- References --
Chapter 16 DOUBLY NONLINEAR DEGENERATE PARABOLIC EQUATIONS ON CARNOT GROUPS -- Abstract -- 1. Introduction -- 2. Notation and Preliminary Result -- 3. Nonexistence Results -- References --
Chapter 17 SOME SCALAR CONSERVATION LAWS WITH DISCONTINUOUS FLUX -- Abstract -- 1. Introduction -- 2. Definition of an Entropy Solution -- 3. Conditions at the Interface $\{x_0=0\}$ -- 4. The Uniqueness Theorem -- 5. Existence of an Entropy Solution -- 5.1. First Step: $u_0 C_c(\cdot)$ -- 5.2. Second Step: $u_0 L(\cdot)$ -- 6. Generalisation -- References --
Chapter 18 A NEW EXACT SOLUTION TO THE DELAYED DIFFUSION EQUATION -- Abstract -- 1. Introduction -- 2. Mathematical Analysis -- 2.1. Problem Formulation -- 2.2. Derivation of a Known Solution -- 2.3. Case of Zero Delay: Diffusion Equation Solution -- 3. Solution in Terms of the Lambert W-function -- 3.1. The Inversion Integral -- 3.2. Exact Time Domain Solution -- 3.3. Analytical Results -- 4. Numerical Results -- 5. Summary -- References --
Chapter 19 LEVEL SETS FOR REACTION DIFFUSION EQUATIONS -- Abstract -- 1. Introduction -- 2. The One Dimensional Case -- 3. The n-Dimensional Case -- References --
Chapter 20 ON THE ALMOST PERIODICITY OF THE SUPERPOSITION OF FUNCTIONS -- Abstract -- 1. Introduction -- 2. Preliminaries -- 3. Main Results -- Acknowledgment -- References --
Chapter 21 TIME PERIODIC SOLUTIONS FOR QUASIGEOSTROPHIC MOTION AND THEIR STABILITY -- Abstract -- 1. Introduction -- 2. The Main Results -- 3. Conclusion -- References --
Chapter 22 JACOBIAN FEEDBACK LOOPS ANALYSIS II: STABILITY AND INSTABILITY -- 1. Introduction -- 1.1. Jacobian Loops: Definitions and Notations. -- 2. Loops and Jacobian Spectrum -- 3. Loop Stability -- 3.1. Loop Analysis in the Plane. -- 3.2.

Loop Analysis for 3-dimensional System. -- 3.3. The Lorenz System. --
 3.4. Rossler System. -- References --
 Chapter23EXISTENCEOFOSCILLATING SOLUTIONFORNONLINEAR STATE-
 DEPENDENT DELAY DIFFERENTIAL EQUATION -- Abstract -- 1.
 Introduction -- 2. Proof of Theorems 1.1 and 1.2 -- 3. Proof of Theorems 1.
 3 and 1.4.
 4. Examples -- References --
 Chapter24SEMILINEAR ABSTRACT DIFFERENTIAL EQUATIONS WITH DEVIATE
 D ARGUMENT -- Abstract -- 1. Introduction -- 2. Basic Results --
 References -- Chapter25SINGULAR SOLUTIONS OF A SEMI-
 LINEAR ELLIPTIC EQUATION ON NON-SMOOTH DOMAINS -- Abstract -- 1.
 Introduction -- 2. Preliminaries and Known Results -- 3.
 Proof of Theorem 1.1. -- 4. The Classes $K_{loc}(D)$ and $K(D)$. --
 Acknowledgment -- References --
 Chapter26EXISTENCE OF WEIGHTED PSEUDO-ALMOST PERIODIC SOLUTIONS
 TO SOME NON-AUTONOMOUS DIFFERENTIAL EQUATIONS -- Abstract --
 1. Introduction -- 2. Preliminaries -- 3.
 Properties of Weighted Pseudo-Almost Periodic Functions -- 4.
 Weighted Pseudo-Almost Periodic Solutions -- 5. Example -- References
 -- Chapter27AKRASNOSELSKII-
 TYPE FIXED POINT THEOREM FOR MULTIFUNCTIONS DEFINED ON A HYPERCO
 NVEX SPACE -- Abstract -- 1. Introduction -- 2. Preliminaries -- 3.
 Main Result -- 4. Remarks -- References -- INDEX -- Blank Page.

Sommario/riassunto

Contains papers on the theory and methods of linear or non-linear
 evolutions as well as their further applications.
