Sommario/riassunto	Fourteen experts examine the current state of Central Valley prehistoric

research and provide an important touchstone for future archaeological study of the region. The Mississippi Valley region has long played a critical role in the development of American archaeology and continues to be widely known for the major research of the early 1950's. To bring the archaeological record up to date, fourteen Central Valley experts address diverse topics including the distribution of artifacts across the landscape, internal configurations of large fortified settlements, human-bo
