

1. Record Nr.	UNINA9910959670803321
Autore	Nalewajski R. F (Roman F.)
Titolo	Information origins of the chemical bond / / Roman F. Nalewajski
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2010
ISBN	1-61122-929-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (198 p.)
Collana	Chemistry research and applications series
Disciplina	541/.224
Soggetti	Chemical bonds Chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- INFORMATION ORIGINS OF THE CHEMICAL BOND -- INFORMATION ORIGINS OF THE CHEMICAL BOND -- CONTENTS -- ACRONYMS -- PREFACE -- Chapter 1 INTRODUCTION TO INFORMATION THEORY -- 1.1. ENTROPY AND INFORMATION -- 1.2. RELATIVE MEASURES OF INFORMATION CONTENT -- 1.3. DEPENDENT PROBABILITY DISTRIBUTIONS -- 1.4. COMMUNICATION SYSTEMS AND THEIR ENTROPY//INFORMATION DESCRIPTORS -- 1.5. SEVERAL PROBABILITY SCHEMES -- 1.6. VARIATIONAL PRINCIPLES -- Chapter 2 SCHRÖDINGER EQUATIONS FROM FISHER INFORMATION -- 2.1. FISHER INFORMATION FOR COMPLEX PROBABILITY AMPLITUDES -- 2.2. CONTINUITY EQUATIONS -- 2.3. STATIONARY SCHRÖDINGER EQUATION AS INFORMATION PRINCIPLE -- 2.4. TIME-DEPENDENT SCHRÖDINGER EQUATION FROM FISHER INFORMATION -- 2.5. INFORMATION PRINCIPLE GENERATING KOHN-SHAM EQUATIONS -- 2.6. INFORMATION PRINCIPLE FOR ADIABATIC SEPARATION OF ELECTRONS AND NUCLEI -- 2.7. SUPERPOSITION PRINCIPLES -- Chapter 3 ELECTRON DISTRIBUTIONS AS CARRIERS OF INFORMATION IN MOLECULES -- 3.1. ALTERNATIVE LOCAL INFORMATION PROBES OF CHEMICAL BONDS -- 3.2. COMPARISON BETWEEN DENSITY-DIFFERENCE AND INFORMATION-DISTANCE DIAGRAMS -- 3.3. ENTROPY DISPLACEMENT DESCRIPTORS -- 3.4. ILLUSTRATIVE APPLICATION TO PROPELLANES -- Chapter 4 BONDED ATOMS FROM INFORMATION THEORY -- 4.1. CHEMICAL CONCEPTS -- 4.2. STOCKHOLDER ATOMS- IN-MOLECULES -- 4.3. INFORMATION-THEORETIC JUSTIFICATION --

4.4. REPRESENTATIVE INFORMATION DENSITIES -- Chapter 5
IMPORTANCE OF NON-ADDITIVE INFORMATION MEASURES -- 5.1.
ALTERNATIVE RESOLUTIONS AND THEIR ADDITIVE AND NON-ADDITIVE
COMPONENTS -- 5.2. ELECTRON LOCALIZATION FUNCTION -- 5.3.
CONTRA-GRADIENT CRITERION OF BOND LOCALIZATION -- 5.4.
ILLUSTRATIVE APPLICATIONS -- 5.5. CONCLUDING REMARKS --
Chapter 6 ORBITAL COMMUNICATION THEORY OF THE CHEMICAL
BOND -- 6.1. INTRODUCTION -- 6.2. MOLECULAR INFORMATION
SYSTEM IN ATOMIC ORBITAL RESOLUTION.
6.3. COVALENT AND IONIC DESCRIPTORS OF CHEMICAL BONDS -- 6.4.
TWO-ORBITAL MODEL OF CHEMICAL BOND -- 6.5. BOND-WEIGHTED
CHANNELS AND WIBERG INDEX -- 6.6. ADDITIVE AND NON-ADDITIVE
INFORMATION CHANNELS -- 6.7. MANY-ORBITAL PHENOMENA IN OCT
-- CONCLUSION -- Appendix A INFORMATION CONTINUITY REVISITED
-- A.1. PROBABILITY, CURRENT AND INFORMATION DENSITIES -- A.2.
TIME-DEPENDENT PHENOMENA AND STATIONARY ACTION PRINCIPLE
-- A.3. PROBABILITY CONTINUITY -- A.4. STATIONARY-STATE
RELATIONS -- A.5. INFORMATION BALANCE -- Appendix B
CONDITIONAL PROBABILITIES FROM THE BOND-PROJECTED
SUPERPOSITION PRINCIPLE -- Appendix C MANY-STATE
SUPERPOSITION PERSPECTIVE -- Appendix D COUPLING APPROACH
TO MANY-ORBITAL BOND INTERACTIONS -- ACKNOWLEDGMENTS --
BIBLIOGRAPHY -- INDEX -- Blank Page.

Sommario/riassunto

The information theory is one of the youngest branches of the applied probability theory. An understanding of the distribution of information in molecules and its displacements accompanying chemical reactions is explored in this book.
