

1. Record Nr.	UNINA9910959671203321
Autore	Guiasu Silviu
Titolo	Probabilistic models in operations research / / Silviu Guiasu
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2009
ISBN	1-60876-533-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (300 p.)
Soggetti	Operations research Probabilities
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 286-288) and index.
Nota di contenuto	Intro -- PROBABILISTIC MODELS INOPERATIONS RESEARCH -- PROBABILISTIC MODELS INOPERATIONS RESEARCH -- Contents -- INTRODUCTION -- Chapter 1. GAME THEORY -- ABSTRACT -- 1. Generalities -- 2. Pure strategies -- 3. Mixed strategies -- 4. Graphical method -- 5. Brown's algorithm -- 6. The linear programs induced by a two-person zero-sum game -- 7. Computer tips -- 1. LINDO. -- 2. SAS-OR. -- 3. EXCEL. -- 4. MATHEMATICA. -- 8. Prisoner's dilemma -- 9. n-person games -- Chapter 2. DECISION THEORY -- ABSTRACT -- 1. Generalities -- 2. Oil-drilling example -- 3. Decision without experimentation -- 4. Decision with experimentation -- 5. Risk function -- 6. Computer tips -- 1 FORTRAN. -- 2. MATHEMATICA. -- 7. Multiple-stage decision -- A variant of the decision tree problem. -- Chapter 3. SIMULATION -- ABSTRACT -- 1. Generalities -- 2. Minitab -- 3. Random numbers -- 4. Sampling from discrete probability distributions -- 5. Sampling from continuous probability distributions -- 6. Monte Carlo method -- Chapter 4. RELIABILITY -- ABSTRACT -- 1. Structure function -- 2. Exact reliability -- 3. Bounds for reliability -- 4. Lifetime -- Chapter 5. QUEUEING SYSTEMS -- ABSTRACT -- 1. Generalities -- 2. Steady state condition -- 3. M=M=1 with constant mean arrival rate and constant meanservice rate -- 4. M=M=s with constant mean arrival rate and constant meanservice rate per busy server -- 5. Waiting time -- 6. Finite queue -- 7. Finite input source -- 8. Other queueing systems -- 9. Number of arrivals during the time- interval [0 -- t] -- 10. Computer tips -- 11. Simulation -- APPENDIX --

The dual theorem -- References -- Index.

Sommario/riassunto

Operations Research, often abbreviated as OR, is a branch of Applied Mathematics. Its aim is to optimise mathematical models of reality involving probabilistic uncertainty and its results are applied to real life problems. This book intends to cover the main chapter of the OR probabilistic models based on optimisation.
