Sommario/riassunto

Given the fact that there are widely different types of text, it is unlikely that every text is processed in the same way. It is assumed here that for each text type, proficient readers have developed a particular cognitive control system, which regulates the basic operations of text comprehension. The book focuses on the comprehension of literary texts, which involves specific cognitive strategies that enable the reader to respond flexibly to the indeterminacies of the literary reading situation. The study relies heavily on methods and theoretical conceptions from cognitive psychology and pres
