Sommario/riassunto

“Persona” è un concetto chiave nella cultura occidentale. La ricca sedimentazione di significati che si è verificata nel corso dei secoli guadagna ulteriore spessore nel confronto con altre idee fondamentali come “soggettività”, “identità”, “relazione”. Questa raccolta di saggi esplora il concetto di persona attraverso diverse discipline, come la semiotica, la filosofia, l’antropologia, la pedagogia, la storia delle religioni. A un primo nucleo di contributi in cui prevale la riflessione teorica (con saggi di Ugo Volli, Carlo Capello, Emanuele Fadda, Sara Nosari), segue una seconda parte dedicata all’interpretazione delle idee di grandi pensatori, tra cui Paolo di Tarso, Karol Wojtya e Gaspard Koenig, con saggi di Stefano Traini, Francesco Galofaro e Gianmarco Giuliana. Infine, la terza parte si concentra sull’analisi di casi pratici, dai videogiochi agli “spettri digitali” lasciati dalle persone dopo la loro morte, dalle app per interagire con Babbo Natale al fenomeno della persona collettiva nello star system, fino alla codifica dello status di personaggi religiosi, in particolare la Vergine, nelle testimonianze delle apparizioni (con saggi di Marco Papasidero, Davide Sisto, Alessandro Agnese, Eleonora Chiais).

Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Temporality and commemoration in Estonian dailies / Halliki Harro-Loit, Anu Pallas -- Divided memory and its reflection in Russian minority media in Estonia in 1994 and 2009 / Valeria Jakobson -- Journalistic commemoration of the Molotov-Ribbentrop Pact in Estonia, 1989-2009 / Ene Koresaar, Kristiina Muur, Tiiu Kreegipuu -- 22 September 1944 in Soviet Estonian anniversary journalism / Marek Mul -- the visual representation of women in the Estonian media, 1848-1940 / Roosmarii Kurvits.
Sommario/riassunto	This volume attempts to create a 'relief map' of temporalities in Estonian newspapers over different periods of time. The special focus is on binding the empirical analysis to the theoretical and methodological discussions of the temporality of news(paper) culture. The authors of the articles ask to what extent newspapers report on the past and present and to what extent these reports refer to the future. A diachronic analysis of newspaper texts from different periods of time demonstrates that the temporal focus of newspapers changes over time: in some periods, the past receives remarkably more attention, while in other periods the news timeframe is biased towards current events and the future. One study asks how similar, or different, is the

(re)construction of the past in Estonian daily newspapers published in Estonian and Russian in 1994 and 2009. Two articles focus on analysis of the links between social remembering and anniversary journalism. Another article provides an overview of the depiction of women in Estonian newspapers and magazines from 1848 to 1940. This collection revitalizes the study of time in news discourse, suggesting new methodological perspectives and developing interdisciplinary approaches in cultural theory.
