Sommario/riassunto

Growing Points in Developmental Science is an ISSBD publication based on the millennium symposia papers published in the International Journal of Behavioral Development in 2000. This collection of overview chapters summarises the state of the art and the way forward for this discipline. Experienced researchers as well as younger, cutting-edge scientists have contributed to this international collection. The topics range from early experience to old age, and include issues in both social and cognitive development. Particular interests are investigated, such as the biological
