

1. Record Nr.	UNINA9910960041403321
Titolo	Client/server applications with Visual FoxPro and SQL server / / Chuck Urwiler ... [et al.]
Pubbl/distr/stampa	Whitefish Bay, Wis., : Hentzenwerke Publishing, c2000
ISBN	1-280-55202-6 9786610552023 1-930919-11-5
Descrizione fisica	1 online resource (263 p.)
Altri autori (Persone)	UrwilerChuck
Disciplina	005.756/5
Soggetti	Database management - Computer programs
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.

Sommario/riassunto

Visual FoxPro is the perfect front end for client-server applications. Its robust user interface, native local data engine and integral hooks into binding with remote data sources, and rich object model, combined with the powerful SQL Server database engine are an unbeatable combination. But with power and flexibility comes potential complexity. Client-Server Applications with Visual FoxPro and SQL Server will teach you how to put these two powerful tools together and take advantage of the best features of both. Urwiler, DeWitt, Levy and Koorhan together have decades of real-world client-server application building as well as the broad, in-depth knowledge gained only through hundreds of hours of classroom training.
