Sommario/riassunto	The spleen is an organ responsible for many biological functions, such as immunological defense, the removal of foreign particles from the blood stream, the metabolism of bilirubins, lipids and several amino acids, the control of the number and maturity of blood leukocytes and platelets and haematopoiesis. This book is a collection of medical methods written exclusively to show the spleen in relation to basic sciences (anatomy and physiology) and related clinical practice and is a useful resource for clinical physicians, haematologists, oncologists, general surgeons, and oncologic surgeons.

Sommario/riassunto	Gender planning is not an end in itself but a means by which women, through a process of empowerment, can emancipate themselves. Ultimately, its success depends on the capacity of women's organizations to confront subordination and create successful alliances which will provide constructive support in negotiating women's needs at the level of household, civil society, the state and the global system. Gender Planning and Development provides an introduction to an issue of primary importance and constant debate. It will be essential reading for academics, practitioners, undergraduate
