

1. Record Nr.	UNINA9910960189603321
Titolo	Fundamentals and applications of biosorption isotherms, kinetics and thermodynamics / / Yu Liu and Jianlong Wang, editors
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, c2009
ISBN	1-61728-660-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (304 p.)
Collana	Environmental science, engineering and technology series
Altri autori (Persone)	LiuYu <1964-> WangJianlong
Disciplina	660.6/2
Soggetti	Microbial biotechnology Adsorption (Biology)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Intro -- FUNDAMENTALS AND APPLICATIONSOF BIOSORPTION ISOTHERMS,KINETICS AND THERMODYNAMICS -- FUNDAMENTALS AND APPLICATIONSOF BIOSORPTION ISOTHERMS,KINETICS AND THERMODYNAMICS -- LIBRARY OF CONGRESS CATALOGING-IN-PUBLICATION DATA -- CONTENTS -- PREFACE -- Chapter 1: BASIC MICROBIOLOGY: MICROBIAL STRUCTURE AND FUNCTION -- 1.1. OVERVIEW OF CELL STRUCTURE -- 1.1.1. Prokaryotes and Eukaryotes -- 1.1.2. Cellular Structure -- (i) Cellular Wall -- ii) Cellular Membrane -- (iii) Cytoplasm -- iv) Nuclear Area -- 1.2. BACTERIA -- 1.2.1. Size and Shape -- 1.2.2. Cell Structure -- 1.2.3. Cell Wall -- (I) Gram-Positive Cell Walls -- (II) Gram-Negative Cell Walls -- 1.2.4. Capsules -- 1.2.5. S-Layers -- 1.3. FUNGI -- 1.4. ALGAE -- 1.5. CHEMICAL FUNCTIONAL GROUPSRELATED TO THE BIOSORPTION -- ACKNOWLEDGMENTS -- REFERENCES -- Chapter 2: BIOSORBENTS -- 2.1. TYPES OF BIOSORBENTS -- 2.2. BACTERIA -- 2.3. FUNGI -- 2.3.1. Yeast - Saccharomyces Cerevisiae -- 2.3.1.1. Advantages of S. Cerevisiae as Biosorbents in Metal Biosorption -- 2.3.1.2. Forms of S. Cerevisiae Used for Biosorption -- 2.3.1.3. Biosorptive Capacity of S. Cerevisiae -- 2.3.1.4. Selectivity and Competitive Biosorption by S. Cerevisiae -- 2.3.2. Filamentous Fungi -- 2.3.2.1. Penicillium -- 2.3.2.2. Aspergillus -- 2.3.2.3. White Rot Fungi -- 2.3.3. Selectivity and Competitive Biosorption by Fungi -- 2.3.4. Comparison among Fungi

and Yeast and Other Biomaterials -- 2.4. MARINE ALGAE -- 2.4.1. Introduction to Microbiology of Algae -- 2.4.2. Algae Used for Biosorption -- 2.5. EFFECT OF PRE-TREATMENT ON BIOSORPTION -- 2.6. IMMOBILIZED BIOMASS FOR BIOREACTORS AND REGENERATION/REUSE -- 2.7. BIOSORBENT SELECTION AND ASSESSMENT -- 2.8. DEVELOPMENT OF NOVEL BIOSORBENTS -- 2.9. COMMERCIAL APPLICATIONS -- 2.9.1. Several Attempts of the Biosorption Commercialization -- 2.9.2. Application Feasibility and Considerations. 2.10. OPPORTUNITY OF BIOSORPTION RESEARCH -- 2.11. CHALLENGES OF BIOSORPTION RESEARCH -- 2.12. SELECTION OF BIOMATERIALS -- ACKNOWLEDGMENTS -- REFERENCES -- Chapter 3: BIOSORPTION ISOTHERMS AND THERMODYNAMICS -- 3.1. INTRODUCTION -- 3.2. LANGMUIR ISOTHERM EQUATION -- 3.2.1. Equilibrium Approach for Derivation of Langmuir Isotherm -- 3.2.2. Kinetic Approach for Derivation of Langmuir Isotherm -- 3.2.3. Some Consideration on Use of Langmuir Kinetics -- 3.3. FREUNDLICH ISOTHERM EQUATION -- 3.4. SIPS ISOTHERM EQUATION -- 3.4.1. Derivation from an Equilibrium Approach -- 3.4.2. Derivation of Sips Isotherm from a Thermodynamic Approach -- 3.5. REDLICH-PETERSON ISOTHERM EQUATION -- 3.6. KHAN ISOTHERM EQUATION -- 3.7. TOTH ISOTHERM EQUATION -- 3.8. RADKE-PRAUSNITZ ISOTHERM EQUATION -- 3.9. DUBININ-RADUSHKEVICH ISOTHERM EQUATION -- 3.10. FRUMKIN ISOTHERM EQUATION -- 3.11. FLORY-HUGGINS ISOTHERM EQUATION -- 3.12. BET ISOTHERM EQUATION -- 3.13. TEMKIN ISOTHERM EQUATION -- 3.14. ADSORPTION/BIOSORPTION THERMODYNAMICS -- 3.15. EFFECTS OF INITIAL CONDITIONS ON BIOSORPTION -- 3.15.1. Experimentally Observed Effects of Initial Conditions on Biosorption -- (I) Effect of Initial Adsorbate Concentration on Biosorption Kinetics and Equilibrium -- (II) Effect of Initial Biosorbent Concentration on Biosorption -- 3.15.2. Theoretical Interpretation on the Effect of Initial Conditions on Biosorption Rate Constant -- 3.15.3. Theoretical Interpretation on the Effect of Initial Conditions on Biosorption Equilibrium -- 3.16. SOME OTHER APPROACHES FOR EQUILIBRIUM MODEL -- REFERENCES -- Chapter 4: BIOSORPTION KINETICS -- 4.1. INTRODUCTION -- 4.2. PSEUDO FIRST-ORDER RATE EQUATION FOR ADSORPTION/BIOSORPTION -- 4.2.1. Approach by Boyd et al. (1947) for Derivation of Pseudo First-order Equation -- 4.2.2. Approach by Liu et al. (2003) for Derivation of Pseudo First-order Equation. 4.2.3. Approach by Azizian (2004) for Derivation of Pseudo First-order Equation -- 4.2.4. Approach by Rudzinski and Plazinski (2006) for Derivation of Pseudo First-Order Equation -- 4.2.5. Estimate of Kinetic Constants in First-order Rate Equation -- 4.3. PSEUDO SECOND-ORDER RATE EQUATION FOR ADSORPTION/BIOSORPTION -- 4.3.1. Approach by Blanchard et al. (1984) for Derivation of Pseudo Second-order Equation -- 4.3.2. Approach by Azizian (2004) for Derivation of Pseudo Second-order Equation -- 4.3.4. Approach by Rudzinski and Plazinski (2006) for Derivation of Pseudo Second-order Equation -- 4.3.5. Estimate of Kinetic Constants in Second-order Rate Equation -- 4.4. LANGMUIR KINETICS FOR ADSORPTION/BIOSORPTION -- 4.5. A GENERAL RATE LAW EQUATION FOR ADSORPTION/BIOSORPTION -- 4.5.1. Uncertainty of Preset-order Rate Equations in Description of Biosorption Data -- (1) Description of Biosorption Data by Various Preset-Order Kinetic Equations -- (2) Uncertainty Incurred in Kinetic Description of Biosorption Data -- 4.5.2. A General Kinetic Equation for Biosorption -- (i) Approach by Liu and Shen (2008a) -- (ii) Approach by Brouers and Sotolongo-Costa (2006) -- 4.6. OTHER USEFUL KINETIC EQUATIONS FOR ADSORPTION/BIOSORPTION -- 4.6.1. Elovich Equation

-- 4.6.2. Weber-Morris Equation or Intraparticle Diffusion Equation --
 4.7. SOME STATISTICAL METHODS FOR EVALUATION
 OF ADSORPTION/BIOSORPTION MODELS FITNESS -- 4.7.1. Correlation
 Coefficient -- 4.7.2. Prediction Error Square -- 4.7.3. Relative
 Goodness of Curve Fitting -- 4.7.4. F-test -- 4.7.5. P-value -- 4.7.6.
 Remarks -- REFERENCES -- Chapter 5: GENERAL MECHANISMS OF
 BIOSORPTION -- 5.1. INTRODUCTION -- 5.2. PROCESS OF METAL ION
 SORPTION -- 5.3. EXTRA CELLULAR ACCUMULATION/PRECIPITATION --
 5.4. CELL SURFACE SORPTION/PRECIPITATION -- 5.4.1. Ion Exchange
 -- 5.4.2. Complexation -- 5.4.3. Precipitation and Redox Reaction.
 5.5. INTRACELLULAR ACCUMULATION -- 5.6. INSTRUMENTAL TOOLS
 AND TECHNIQUES -- 5.6.1. Introduction -- 5.6.2. FTIR -- 5.6.3.
 Titration -- 5.6.4. SEM-EDX -- 5.6.5. TEM-EDX -- 5.6.6. AFM -- 5.6.7.
 XAS -- 5.6.8. XPS -- 5.6.9. NMR -- 5.6.10. CLSM --
 ACKNOWLEDGMENTS -- REFERENCES -- Chapter 6: FACTORS
 INFLUENCING BIOSORPTION PROCESS -- 6.1. INTRODUCTION -- 6.2.
 PROPERTIES OF METAL IONS -- 6.3. INFLUENCE OF PH -- 6.4.
 TEMPERATURE EFFECT -- 6.5. IONIC STRENGTH EFFECT -- 6.6.
 PRESENCE OF ANIONS AND CATIONS -- 6.7. OTHER FACTORS -- 6.7.1.
 Contact Time -- 6.7.2. Cell Culture Conditions -- ACKNOWLEDGMENTS
 -- REFERENCES -- Chapter 7: CORRELATING METAL IONIC
 CHARACTERISTICS WITH BIOSORPTION CAPACITY -- 7.1. EFFECTS OF
 ION CHARACTERISTICS ON METAL BIOSORPTION -- 7.2. THEORETIC
 BASIS FOR APPLICATION OF QICARS IN METAL BIOSORPTION -- 7.3.
 APPLICATION OF QSARS METHOD IN BIOSORPTION OF METAL IONS --
 7.4. METAL ION CHARACTERISTICS PARAMETERS AND CORRELATION
 APPROACH -- 7.4.1. Biomass and Metal Ions -- 7.4.2. Selection of
 Characteristic Parameters -- 7.4.3. Maximum Biosorption Capacity
 q_{max} -- 7.4.4. Characteristic and Q_{max} : Correlation of Relationships
 -- 7.5. CLASSIFICATION OF METAL IONS AND THEIR SORPTION
 CAPACITY -- 7.6. EFFECT OF ION CHARACTERISTICS ON METAL-
 BIOMASS INTERACTION -- 7.7. REMARKS -- ACKNOWLEDGMENTS --
 REFERENCES -- Chapter 8: BIOSORPTION OF HEAVY METALS BY
 AEROBIC GRANULES: AN INNOVATIVE APPROACH -- 8.1. INTRODUCTION
 -- 8.2. WHAT ARE AEROBIC GRANULES? -- 8.3. PROBLEM ASSOCIATED
 WITH APPLICATION OF BIOSORPTION TECHNOLOGY -- 8.4. ELEMENTAL
 COMPOSITION OF FRESH AEROBIC GRANULES -- 8.5. ELEMENTAL
 COMPOSITION OF AEROBIC GRANULES AFTER BIOSORPTION -- 8.6.
 CHEMICAL PRECIPITATION OF HEAVY METALS DURING BIOSORPTION --
 8.7. CONTRIBUTION OF ECP TO BIOSORPTION -- 8.8. CONTRIBUTION
 OF ION EXCHANGE TO BIOSORPTION -- 8.9. ROLE OF GRANULE
 FUNCTIONAL GROUPS TO METAL BIOSORPTION.
 8.10. SPATIAL DISTRIBUTION OF ADSORBED HEAVY METAL IN AEROBIC
 GRANULE -- 8.11. EFFECT OF PH ON BIOSORPTION OF HEAVY METAL BY
 AEROBIC GRANULES -- REFERENCES -- INDEX.

Sommario/riassunto

Biosorption is an effective technology for the removal of organic and metallic elements, especially heavy metals from aqueous solution. This book aims to provide all necessary basic knowledge of biosorption in terms of its fundamentals and main application.
