

1. Record Nr.	UNINA9910960254803321
Titolo	Avoiding Technology Surprise for Tomorrow's Warfighter : symposium 2010 / / Committee for the Symposium on Avoiding Technology Surprise for Tomorrow's Warfighter, Division on Engineering and Physical Sciences ; National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 2010
ISBN	9786612975936 9780309186650 030918665X 9781282975934 1282975935 9780309155694 030915569X
Descrizione fisica	1 online resource (63 p.)
Disciplina	355.3432
Soggetti	Military intelligence - United States Technology assessment - United States Military research - United States Combat survivability (Military engineering) National security - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front Matter""; ""Preface""; ""Acknowledgment of Reviewers""; ""Contents""; ""Acronyms and Abbreviations""; ""1 Motivation for the Symposium""; ""2 Considering Surprise""; ""3 Discussion, Analysis, and Key Themes""; ""4 Challenges of Technology Surprise for the Warfighter""; ""Appendices""; ""Appendix A: Committee Biographies""; ""Appendix B: Participating Organizations and Agenda""; ""Appendix C: Summary of Sessions""
Sommario/riassunto	The Symposium on Avoiding Technology Surprise for Tomorrow's Warfighter is a forum for consumers and producers of scientific and technical intelligence to exchange perspectives on the potential sources

of emerging or disruptive technologies and behaviors, with the goal of improving the Department of Defense's technological warning capability. This volume summarizes the key themes identified in the second and most recent symposium, a two-day event held in Suffolk, Virginia, on April 28 and 29, 2010. The symposium combined presentations highlighting cutting-edge technology topics with facilitated discourse among all participants. Three categories of surprise were identified: breakthroughs in product and process technology, new uses of existing technology, and the unexpectedly rapid progression of a technology to operational use. The incorporation of an adversary's own culture, history, beliefs, and value systems into analyses also emerged in discussions as an important factor in reducing surprise.
