Titolo	Biomass gasification : chemistry, processes, and applications / / Jean-Pierre Badeau and Albrecht Levi, editors
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, c2009
ISBN	1-61122-683-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (490 p.)
Collana	Renewable energy. Research, development and policies series
Altri autori (Persone)	BadeauJean-Pierre LeviAlbrecht
Disciplina	665.7/76
Soggetti	Biomass gasification Chemistry, Technical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- BIOMASS GASIFICATION: CHEMISTRY, PROCESSES AND APPLICATIONS -- BIOMASS GASIFICATION: CHEMISTRY, PROCESSES AND APPLICATIONS -- CONTENTS -- PREFACE -- A GLOBAL PERSPECTIVE ON BIOMASS GASIFICATION -- ABSTRACT -- INTRODUCTION: PRESENT AND FUTURE FOR BIOMASS FUELS -- THE PROSPECTS FOR BIOMASS GASIFICATION -- DISCUSSION -- ACKNOWLEDGMENTS -- REFERENCES -- INNOVATION ON BIOMASS WASTES UTILIZATION THROUGH GASIFICATION AND CO-GASIFICATION. 1. INTRODUCTION.

Sommario/riassunto

Biomass gasification means incomplete combustion of biomass
resulting in the production of combustible gases consisting of carbon
monoxide, hydrogen and methane. This book examines the importance
of biomass gasification and assesses the possibility of biomass
exploitation as an alternative to conventional fuel.
