Sommario/riassunto	This is an optimistic and empowering approach to the daunting task of teaching diabetes patients to care for themselves. Written by a highly

respected diabetes educator who has suffered with diabetes for 25 years, the guide provides the clinical and personal expertise that will help nurses and other health professionals to successfully teach diabetes self-management and compliance to adults, children, adolescents, and parents. The book contains a vast reservoir of information ranging from a thorough overview of diabetes and the physical and emotional toll of living with the disease to number o
