Securities companies and information disclosure -- 4. Regulating financial intermediaries -- 5. The role and function of the China Securities Regulatory Commission -- 6. Investor protection : problems and progress.
Sommario/riassunto	This book provides an analysis of the development of the Chinese securities market, with special reference to the information disclosure regimes in Mainland China, the UK, and Hong Kong. The book looks at the role and functions of the securities regulatory commission, and explores the past and current status of the information disclosure regime in the Chinese securities market. By identifying problems and their reasons, the book forms an approach to further develop securities regulation.
