Sample of fully coded transcript; Index of Languages; Index of Authors; Index of Subjects; The Series LANGUAGE ACQUISITION AND LANGUAGE DISORDERS
Sommario/riassunto	This book discusses the first language acquisition of three morphosyntactic mechanisms of transitivity alternation in arctic Quebec Inuktitut. Data derive from naturalistic longitudinal spontaneous speech samples collected over a nine-month period from four Inuit children. Both basic and advanced forms of passive structures are shown to be used productively by Inuktitut-speaking children at an early age relative to English-speaking children, but consistent in age with speakers of non-Indo-European languages reported on in the literature.
