

1. Record Nr.	UNINA9910960565103321
Titolo	Mycorrhiza : occurrence in natural and restored environments // Marcela Pagano, editor
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, c2012
ISBN	1-62081-772-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (343 p.)
Collana	Environmental science, engineering and technology series
Altri autori (Persone)	PaganoMarcela
Disciplina	631.4/6
Soggetti	Mycorrhizas
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- MYCORRHIZA OCCURRENCE IN NATURAL AND RESTORED ENVIRONMENTS -- MYCORRHIZA OCCURRENCE IN NATURAL AND RESTORED ENVIRONMENTS -- Library of Congress Cataloging-in-Publication Data -- Contents -- Preface -- Chapter 1 ARBUSCULAR MYCORRHIZAS IN NATURAL ENVIRONMENTS: AN OVERVIEW -- Abstract -- Introduction -- Soil Conditions and Mycorrhizas -- AM Fungi and Plant Succession -- Root Colonization in Nature -- Am Spore Distribution and Diversity -- Glomalin in Natural Environments -- Conclusions -- References -- Chapter 2 LARGE-SCALE DIVERSITY PATTERNS IN SPORE COMMUNITIES OF ARBUSCULAR MYCORRHIZAL FUNGI -- Abstract -- Introduction -- Methods -- Sample Collection and Spore Extraction -- Data Analysis -- Results and Discussion -- Relationship between AM Fungal and Plant Diversity -- Latitudinal Patterns in AM Fungal Diversity -- Influence of Disturbance on AM Fungal Diversity -- Management Implications -- Conclusion -- Acknowledgments -- References -- Chapter 3 ARBUSCULAR MYCORRHIZAS AND THEIR IMPORTANCE FOR TROPICAL FOREST FORMATION IN BRAZIL -- Abstract -- 1. Introduction -- 2. Response of Tropical Native Woody Species to AM Inoculation -- 3. Nutrient Acquisition by Plants -- 3.1. Root Morphology and AM Root Colonization for Nutrient Acquisition -- 4. AM Fungus Amount during Plant Succession -- 5. Inoculum of AM Fungus Available in Soil -- 6. Change in Plant Strategy for Nutrient Acquisition during Succession Progress -- 6. Importance of AM Fungus for Initial Forest Structuring --

7. AM Association on Revegetation Programs and Recovery of Degraded Lands -- References -- Chapter 4 ARBUSCULAR MYCORRHIZAL FUNGI IN THE AMAZON REGION -- Abstract -- References -- Chapter 5 OCURRENCE OF MYCORRHIZAS IN HIGHLAND FIELDS -- Abstract -- Introduction -- Soil Conditions in the Rock Outcrops in Minas Gerais, Brazil.  
AM Spore Distribution and Diversity in the Rock Outcrops -- Economic Importance of the Vegetal Species in the Rock Outcrops -- Benefits and Problems Encountered in the Study -- Conclusion -- Acknowledgments -- References -- Chapter 6 CO-OCURRENCE OF ARBUSCULAR MYCORRHIZAS AND DARK SEPTATE ENDOPHYTES IN PTERIDOPHYTES FROM A VALDIVIAN TEMPERATE RAINFOREST IN PATAGONIA, ARGENTINA -- Abstract -- Introduction -- Valdivian Temperate Rainforests -- Temperate Rainforests: General Description -- The Valdivian Temperate Rainforest Region -- Puerto Blest -- Analyzing Arbuscular Mycorrhizas in Pteridophytes -- Mycorrhizal Colonization in Pteridophytes of Puerto Blest -- Pteridophytes -- Mycorrhizal Status of Pteridophytes Present in Puerto Blest -- a) Non-mycorrhizal -- b) Facultatively Mycorrhizal -- c) Consistently Mycorrhizal -- Dark Septate Endophytes -- Conclusion -- Acknowledgments -- References -- Chapter 7 MYCORRHIZAS, AN IMPORTANT COMPONENT IN SEMIARID SITES -- Abstract -- Introduction -- Reports for Brazil -- Reports for Minas Gerais State Brazil -- Soils and Climatic Conditions -- Spore Distribution and Diversity -- Root Colonization by AMF -- AMF and Land Disturbation -- Problems Encountered in the Studies and Future Directions -- Conclusion -- Acknowledgments -- References -- Chapter 8 MYCORRHIZAL STATUS AND RESPONSIVENESS OF EARLY SUCCESSIONAL COMMUNITIES FROM CHAQUEAN REGION IN CENTRAL ARGENTINA -- Abstract -- Introduction -- Mycorrhizal Status of Ruderal Species in the Chaquean Region -- The Role of AMF in Ruderal Communities -- Effect of AMF on Growth and Interactions between Ruderal Species -- Effects of AMF on Dominance in Ruderal Community -- Effects of AMF on Productivity in Ruderal Community -- Model on the Effect of AMF on Plant Succession -- Implications for Management -- Conclusion -- References.  
Chapter 9 MEASURING AND ESTIMATING ECTOMYCORRHIZAL FUNGAL DIVERSITY: A CONTINUOUS CHALLENGE -- Abstract -- Ectomycorrhizal Symbiosis on the Stage! -- Phylogenetic Evidence -- Root Endophytic and ECM Ascomycetes -- ECM Fungi Guild: The New Members Are... -- Saprotrophic Life Styles of ECM Fungi -- Concluding Remarks -- References -- Chapter 10 MYCORRHIZAL DIVERSITY IN NATIVE AND EXOTIC WILLOWS (*SALIX HUMBOLDTIANA* AND *S. ALBA*) IN ARGENTINA -- Abstract -- Introduction -- Environmental Factors Affecting ECM Diversity -- Soil Moisture -- Soil pH -- Soil Nutrients Levels -- Soil Structure -- Microsites Effect -- ECM Functioning among Aquatic Environments -- *Salix alba* L. ECM Diversity along an Arid to Riparian Gradient in Central Argentina -- *Salix humboldtiana* ECM Diversity in Central Argentina -- Conclusion -- Acknowledgments -- References -- Chapter 11 TREE SPECIES COMPOSITION AND DIVERSITY IN BRAZILIAN FRESHWATER FLOODPLAINS -- Abstract -- 1. Introduction -- 2. Flooding and its Consequence for Tree Vegetation -- 3. Definition, Extent and Distribution of Tropical Floodplain Forests in Brazil -- 4. Flooded Forests of the Amazon Basin -- 4.1. Environment -- 4.2. Tree Vegetation of Seasonally Floodplains along Large Rivers -- 4.3. Further Flooded Forest Types in the Amazon Basin -- 5. Flooded Forests of the Cerrado -- 5.1. Environment -- 5.2. Tree Vegetation of Hyperseasonal Savannas: The Pantanal -- 5.3. Tree Vegetation of Riparian forests of the Cerrado -- 6. The Atlantic Forest Domain -- 6.1. Environment --

6.2. Tree Vegetation of Flooded Forests -- 7. Flood-tolerant Tree Assemblages in Different Brazilian Biomes: Oligarchies and Endemism -- Conclusions -- Acknowledgments -- References -- Chapter 12 ARBUSCULAR MYCORRHIZAE IN AQUATIC PLANTS, INDIA -- Abstract -- Introduction -- AM Fungal Association in Aquatic Plants. AM Fungal Association in Khazan Lands -- Arbuscular Mycorrhizal (AM) Fungal Association in Mangroves -- Conclusion -- Acknowledgments -- References -- Chapter 13 IMPORTANCE OF ARBUSCULAR MYCORRHIZAL FUNGI FOR RECOVERY OF RIPARIAN SITES IN SOUTHERN BRAZIL -- Abstract -- Introduction -- Riparian Forests and Soil Carbon Sequestration -- AMF Species Richness in Riparian Environment -- Concluding Remarks -- References -- Chapter 14 MYCORRHIZAS IN NATURAL AND RESTORED RIPARIAN ZONES -- Abstract -- Introduction -- Mycorrhizas in Riparian Zones -- Mycorrhizas in Riparian Zones from Brazil -- Mycorrhizae in Riparian Zones from Southern Brazil -- Abiotic Conditions -- Plant Growth in Riparian Environments -- Spore Numbers and Phosphate Solubilizing Microorganisms -- Root Colonization In Riparian Areas -- The Diversity of AMF Fungi in Riparian Areas -- AMF Species Richness and Land Use -- Glomalin-Related Soil Protein Content and Land Use -- The Importance of Riparian Areas Conservation and Restoration -- Conclusions and Future Goals -- Acknowledgments -- References -- Index.

#### Sommario/riassunto

This book explores the links between mycorrhizas in the aquatic and riparian ecosystems, presenting research that points to the important role of arbuscular mycorrhizal in these environments. The volume seeks to spur further development of links for understanding AM function in the different soil systems, both in natural and restored ecosystems..
