Visions for the World in 2030 and Beyond -- 15.1 Outlook on Megatrends -- 15.2 Vision Talk: Three Experts Share their Future Perspectives.

---

### Sommario/riassunto

Berthold M. Kuhn and Dimitrios L. Margellos present a thoroughly reflected analysis of global trends shaping our future. Key megatrends include climate change and sustainability, digitalization, growing inequalities, urbanization and smart cities, the progression toward a green economy, and sustainable finance. Addressing geopolitical shifts and the future of multilateralism, the authors also discuss new trends in democracy and governance, migration, and health and nutrition, as well as civilizational developments like demography, diversity, identity politics, individualization, and shifting gender norms. Based on their own research and a series of interviews with leading analysts and researchers from different world regions, the authors present cutting-edge content on the future of humanity.
