Sommario/riassunto	<p>The committee was established in the autumn of 2000 to study the feasibility of expanding the Metropolitan Medical Strike Team model established in Washington, DC and neighboring counties into a national program to respond to a mass-casualty terrorism incident. The attacks of September 2001 accelerated their effort and moved it from more theoretical to more concrete realms. The report is not indexed.</p> <p>Annotation copyrighted by Book News, Inc., Portland, OR</p>
