Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (pages 485-495) and index.
Nota di contenuto	Organisations and markets -- Further issues of demand and supply -- Markets in practice -- The external operating environment -- Investment -- Economic impacts -- The global economy -- Environmental economics.
Sommario/riassunto	This textbook describes the relevance of economics to the tourism and leisure industries, helping you to pass an economics module as part of a tourism, recreation or sport management degree. It applies economic

theory to a range of tourism industry issues at the consumer, business, national and international level by using topical examples to give the theory real-world context. The author explains the impact of the global economic crisis and the importance of understanding what has happened over the course of previous economic business cycles to prepare for what may happen in the future. Contrasting evidence is put forward to provide a sense of the dynamics of world economies.
