

1. Record Nr.	UNINA9910960980803321
Titolo	Front-of-package nutrition rating systems and symbols : promoting healthier choices / / Committee on Examination of Front-of-Package Nutrition Rating Systems and Symbols (Phase II), Food and Nutrition Board ; Ellen A. Wartella ... [et al.], editors ; Institute of Medicine of the National Academies
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, c2012
ISBN	9786613527080 9780309218269 0309218268 9781280123221 1280123222 9780309218245 0309218241
Edizione	[1st ed.]
Descrizione fisica	1 online resource (180 p.)
Altri autori (Persone)	WartellaEllen
Disciplina	613.2
Soggetti	Nutrition Food - Labeling Food - Packing Health promotion - Methodology Obesity - Prevention
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- The food package environment -- The regulatory environment -- Consumers' use of nutrition information and product choices -- Consumer use and understanding of front-of-package labeling systems -- Effects of food package information on consumer preferences, choices, and processing -- A model front-of-package symbol system including criteria for evaluating nutrients -- Promotion, evaluation, and monitoring for front-of-package symbol systems -- Recommendations.
Sommario/riassunto	"During the past decade, tremendous growth has occurred in the use of

nutrition symbols and rating systems designed to summarize key nutritional aspects and characteristics of food products. These symbols and the systems that underlie them have become known as front-of-package (FOP) nutrition rating systems and symbols, even though the symbols themselves can be found anywhere on the front of a food package or on a retail shelf tag. Though not regulated and inconsistent in format, content, and criteria, FOP systems and symbols have the potential to provide useful guidance to consumers as well as maximize effectiveness. As a result, Congress directed the Centers for Disease Control and Prevention (CDC) to undertake a study with the Institute of Medicine (IOM) to examine and provide recommendations regarding FOP nutrition rating systems and symbols. The study was completed in two phases. Phase I focused primarily on the nutrition criteria underlying FOP systems. Phase II builds on the results of Phase I while focusing on aspects related to consumer understanding and behavior related to the development of a standardized FOP system. Front-of-package nutrition rating systems and symbols focuses on Phase II of the study. The report addresses the potential benefits of a single, standardized front-label food guidance system regulated by the Food and Drug Administration, assesses which icons are most effective with consumer audiences, and considers the systems/icons that best promote health and how to maximize their use"--Publisher's description.
