Positive Health and the Council of Public Representatives -- ; 4. Environmentally Induced Gene Expression. Genes Expression and Prenatal Development. Personal Ties and Gene Expression in Midlife. Animal Models and the Consequences of Mother-Child Interactions. Intergenerational Transmission of Behavior. Plasticity of Genetic Trajectories.</p>
Sommario/riassunto	<p>Annotation b Brings together a committee of 15 scientists with backgrounds in the biomedical, social behavioral, and scientific disciplines, who together identify and address a broad set of issues relating to the health of the US population. Themes addressed include predisease pathways, positive health, environmentally induced gene expression, personal ties, collective properties and healthy communities, the influence of inequality on health, population perspectives, interventions, methodology priorities, and research infrastructure. Annotation c. Book News, Inc., Portland, OR (booknews.com).</p>
