Conclusion: Angels and Literary Representation -- Notes -- Index -- A -- B -- C -- D -- E -- F -- G -- H -- I -- J -- K -- L -- M -- N -- O -- P -- Q -- R -- S -- T -- U -- V -- W -- Z. |
| Sommario/riassunto      | Milton's Angels is a study of writing - theological, scientific, political, and poetic - about angels in 16th-century and 17th-century Britain. It demonstrates that angels were integral to the Protestant imagination and argues that Paradise Lost is a poem about angels that is both shockingly literal and sublimely imaginative.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
