Sommario/riassunto	This collection examines the multiple ways people listen to, consume, and produce music and sound in an increasingly digital world. Technologies such as social networks, recommendation algorithms, virtual cloud storage, and portable listening devices increasingly mediate both personal and communal experiences with music. While such technologies may be convenient, their unexamined use raises ethical, socio-political, and philosophical questions. This volume brings together multiple contributions which engage with these questions and others posed by emergent musical and social technologies. Drawing upon a range of different areas of inquiry, it provides a varied critical approach to the question of how people interact with music in the modern era and debates the universal themes of modern music consumption.

Sommario/riassunto	This book examines American literary texts whose portrayal of ""American"" identity involves the incorporation of a ""foreign body"" as the precondition for a comprehensive understanding of itself. This nexus of disconcerting textual dynamics arises precisely insofar as both citizen/subject and national identity depend upon a certain alterity, an ""other"" which constitutes the secondary term of a binary structure. ""American"" identity thus finds itself ironically con-fused and interwoven with another culture or another nation, double-crossed in the enactment of itself. Individual chapters ar
