Republic of Yemen: Statistical Issues""""IV. Technical Assistance Program""
Sommario/riassunto	This 2007 Article IV Consultation highlights that despite recent

progress in poverty reduction, Yemen remains far from achieving the Millennium Development Goals. Oil production has been declining since 2000, and in the absence of major discoveries, proven oil reserves could be depleted in some 10 years' time. Economic performance in 2006 was generally favorable, but was accompanied by an increase in inflation. Overall real GDP growth reached 4 percent in 2006, with a 6 percent non-oil growth offsetting an 8 percent decline in oil production.
