Sommario/riassunto

This is the third book in the Easy Money trilogy which discusses how, what the world now calls the global financial crisis evolved in the aftermath of the real estate bubble bursting in the United States and other parts of the world. In this book, we will try to understand the various reasons behind the financial crisis, and also identify the different villains behind it.

Nota di contenuto

Contents; Tables; Figures; Foreword; Abbreviations; 1 Introduction; 2 The Spratly Islands Dispute: Legal Issues and Prospects for Diplomatic Accommodation; 3 Energy Issues in the South China Sea Region; 4 Security Risks of a South China Sea Conflict; 5 Commercial Observation Satellites for Conflict Avoidance; 6 Cooperative Remote Monitoring in the South China Sea: Comparing the Utility of Aerial and Satellite Imagery; 7 Remote Sensing Capabilities and Experience Available to the South China Sea Littoral States; 8 A Cooperative Monitoring Regime for the South China Sea
9 Environmental Remote Sensing of the South China Sea; 10 Contemporary Maritime Piracy in Southeast Asia; 11 Conclusions; Appendix: Occupied Locations among the Spratly Islands, circa 2000; Recommended Readings; Index; About the Contributors

Sommario/riassunto

The Spratly Islands have represented a potential political and military flashpoint in the South China Sea for years, involving as they do various claims by China, the Philippines, Vietnam, Malaysia, and Taiwan. This edited volume examines the issues involved in light of confidence-building measures that new high-resolution satellite imagery can offer to this, and other, regions. Baker, Wiencek, and their contributors assess the potential role for cooperative monitoring in mitigating the risk of conflict arising from multinational disputes over the Spratly Islands. They analyze how this new generation of civilian and commercial observation satellites can be used to reduce the chances of armed conflict breaking out by providing transparency that will detect and identify politically significant activities occurring at disputed islands and reefs among the Spratlys. Of particular interest to policy makers, scholars, and other researchers involved with military issues in Asia and international security concerns.
