Sommario/riassunto

Author Representations in Literary Reading investigates the role of the author in the mind of the reader. It is the first book-length empirical study on generated author inferences by readers of literature. It bridges the gap between theories which hold that the author is irrelevant and those that give him prominence. By combining insights and methods from both cognitive psychology and literary theory, this book contributes to a better understanding of how readers process literary texts and what role their assumptions about an author play. A series of experiments demonstrate that reader
