Disciplina	578.4/2
Soggetti	Phenology - New England Natural history - New England Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	For native and visitor alike, the New England landscape has a rich allure. This grand sweep of land is a living tapestry woven of interconnected bioregions and natural communities whose compositions of plants and animals have evolved over time. In more than fifty essays, Michael J. Caduto brings readers into the complex stories to be found in nature. Drawing on first-hand experiences and reflections on the relationship between the natural world and humans, Caduto explores some of the plants, animals, natural places, and environmental issues of New England-from dragonflies, cuckoos, and chipmunks to circumpolar constellations and climate change. Stunning illustrations by Adelaide Murphy Tyrol illuminate these elegant and humorous essays.
