

1. Record Nr.	UNINA9910961496003321
Autore	Postel Sandra
Titolo	Rivers for life : managing water for people and nature // Sandra Postel and Brian Richter
Pubbl/distr/stampa	Washington, : Island Press, c2003
ISBN	1-59726-780-5 1-4175-3881-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (266 p.)
Altri autori (Persone)	RichterBrian D
Disciplina	333.91/6216
Soggetti	Stream conservation Ecosystem management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [227]-240).
Nota di contenuto	Intro -- Title Page -- Copyright Page -- Contents -- Acknowledgments -- Ch 1: Where Have All the Rivers Gone? -- Why We Need Healthy Rivers -- The Disruption of Natural Flows -- Freshwater Life at Risk -- A Conceptual View for Balancing Human and Ecosystem Water Needs -- Ch 2: How Much Water Does a River Need? -- The Evolution of a New River Management Paradigm -- Flow Prescriptions Aimed at Ecological Health -- Setting Ecological Goals -- Learning By Doing -- Rebuilding a River's Natural Flow Patterns -- Lessons from the Colorado Pikeminnow -- Ch 3: The Policy Toolbox -- Allocating Water for Ecosystem Support -- South Africa Pioneers the Water "Reserve -- Australia Overhauls Water Policy and Tries a "Cap -- U.S. Policy Lacks Focus on Ecological Health -- Economic Tools for Securing River Flows -- Ethics in River Policy -- Ch 4: Down to the River -- A Comeback Chance for the Missouri? -- Resotring the Brisbane River of Australia's Gold Coast -- Groundwater Pumping and the Future of the San Pedro -- Flows for Shrimp in the Tropical Rio Espiritu Santo -- Reducing Impacts of Federal Dams on Kentucky's Green River -- Sharing the Waters of South Africa's Sabie Rlver -- Ch 5: Building Blocks for Better River Governance -- Capturing the Value of Ecosystem Services -- Lessons From the World Commission on Dams -- Bottom-up Governance Gets a Try -- River Basin Commissions Work "Outside the Box -- Sparks of Leadership -- Ch 6: Epilogue: Can We Save Earth's Rivers? -- Notes --

Sommario/riassunto

The conventional approach to river protection has focused on water quality and maintaining some "minimum" flow that was thought necessary to ensure the viability of a river. In recent years, however, scientific research has underscored the idea that the ecological health of a river system depends not on a minimum amount of water at any one time.
