

1. Record Nr.	UNINA9910961513203321
Autore	Ferreira David A.
Titolo	Recent advances in BIS guided TCI anesthesia // David A. Ferreira ... [et al.]
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2010
ISBN	1-61668-888-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (78 p.)
Collana	Advances in biology and medicine
Altri autori (Persone)	FerreiraDavid A
Disciplina	617.9/6
Soggetti	Anesthetics - Administration - Automatic control Anesthesia - Data processing Patient monitoring
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Mechanisms for cerebral autoregulation -- Total intravenous anesthesia and target controlled infusion -- Electroencephalogram (EEG) and the bispectral index of the EEG (BIS) -- Opioids-remifentanil -- Propofol.
Sommario/riassunto	Approaches the characteristics of propofol and remifentanil that allow the fast emergence of target controlled infusion for general anaesthesia, and its potential for closed loop control anaesthesia.
