ultimate goals -- Final observations on Hitler's global strategy.

Sommario/riassunto

What did Hitler really wanted to achieve: world domination. In the early twenties, Hitler was working on this plan and from 1933 on, was working to make it a reality. During 1940 and 1941, he believed he was close to winning the war. This book not only examines Nazi imperial architecture, armament and plans to regain colonies but also reveals what Hitler said in moments of truth. The author presents many new sources and information, including Hitler's little known intention to attack New York City with long-range bombers in the days of Pearl Harbor.
