A dynamic panel data model estimation -- Chapter 9. Where are the flags of our father? Rethinking linkages between social policies and innovation policies -- Chapter 10. Design theory of Letanta -- Chapter 11. Conclusion.
Sommario/riassunto	A brief overview of the African economic picture reveals a paradox where the continent that has rich mineral resources, nearly a billion people and a land mass which includes the sizes of China, USA, India, Western Europe, Argentina together and still is larger than the sum of these regions is in an unacceptable state of being an object of aid, debt

and loans despite the vast resources both known and yet to be  
explored in it for the whole post-colonial period.
