Nota di contenuto	chapter Introduction -- chapter 1 Climate turmoil: introducing a socioecological model of human action, environmental impact, and mounting vulnerability -- chapter 2 The emergence and maturation of the anthropology of climate change -- chapter 3 The archaeology of climate change -- chapter 4 Theoretical perspectives in the anthropology of climate change -- chapter 5 Case studies in the anthropology of climate change -- chapter 6 Applications of anthropological research on climate change -- chapter 7 What other social scientists are saying about climate change -- chapter 8 Conclusion: toward a critical integrated social science of climate change.
Sommario/riassunto	In addressing the urgent questions raised by climate change, this book provides a comprehensive overview of the anthropology of climate change, guided by a critical political ecological framework. It examines the emergence and slow maturation of the anthropology of climate change, reviews the historic foundations for this work in the archaeology of climate change, and presents three alternative contemporary theoretical perspectives in the anthropology of climate change.
