

1. Record Nr.	UNINA9910961787303321
Autore	Penelis George G
Titolo	Earthquake-resistant concrete structures / / George G. Penelis and Andreas J. Kappos ; with a foreword by P.E. Pinto
Pubbl/distr/stampa	London ; ; New York, : Taylor & Francis, 1997
ISBN	1-4987-1791-8 0-429-17759-3 1-4822-7130-3 1-282-78222-3 9786612782220 0-203-86076-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (607 p.)
Altri autori (Persone)	KapposAndreas J
Disciplina	624.1762
Soggetti	Earthquake resistant design Reinforced concrete construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Book Cover; Title; Copyright; Contents; Foreword; Preface; List of abbreviations; 1 Introduction; 2 Elements of engineering seismology; 3 Elements of structural dynamics; 4 Design principles and design seismic actions; 5 Analysis of the structural system; 6 Design action effects-safety verifications; 7 Earthquake-resistant properties of the materials of reinforced concrete; 8 Earthquake-resistant design of reinforced concrete linear elements; 9 Earthquake-resistant design of reinforced concrete planar elements; 10 Seismic performance of buildings designed to modern seismic codes 11 Seismic pathology12 Emergency post-earthquake damage inspection and evaluation; 13 Design of repair and strengthening; 14 Technology of shoring, repair and strengthening; Index
Sommario/riassunto	"This book introduces practising engineers and post-graduate students to modern approaches to seismic design, with a particular focus on reinforced concrete structures, earthquake resistant design of new buildings and assessment, repair and strengthening of existing buildings."--Provided by publisher.
