

1. Record Nr.	UNINA9910961877203321
Autore	Karam Robert D
Titolo	Satellite thermal control for systems engineers / / Robert D. Karam
Pubbl/distr/stampa	Reston, Va., : American Institute of Aeronautics and Astronautics, c1998
ISBN	1-60086-652-2 1-60086-433-3
Edizione	[1st ed.]
Descrizione fisica	xvii, 262 p. : ill
Collana	Progress in astronautics and aeronautics ; ; v. 181
Disciplina	629.1 s 629.46/75
Soggetti	Artificial satellites - Thermodynamics Artificial satellites - Control systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title -- Copyright -- Table of Contents -- Preface -- Chapter 1. Satellite Temperature and Thermal Energy Management -- I. Introduction -- II. Specifications -- III. Thermal Energy -- IV. Relation Between Heating and Temperature: Method of Thermal Control -- V. Thermal Interface Requirements -- Chapter 2. Heat Transfer -- I. Introduction -- II. Radiation -- III. Conduction -- IV. Convection -- V. Combined Modes of Heat Transfer -- Chapter 3. Radiation in Thermal Control -- I. Introduction -- II. Radiation Intensity and Exchange Factors -- III. Satellite Enclosures -- IV. Optical Properties -- Chapter 4. Heating Fluxes -- I. Introduction -- II. Ground Environment -- III. Ascent Heating -- IV. Orbit Environment Heating Fluxes -- V. Orbit Normal Incident Fluxes -- VI. Charged Particles -- Chapter 5. Satellite Thermal Analysis -- I. Introduction -- II. Thermal Energy Equation -- III. Thermal Model -- IV. Approximate Analytical Solutions -- V. Transients -- Chapter 6. Thermal Control Hardware -- I. Introduction -- II. Multilayered Insulation -- III. Surface Coatings and Finishes -- IV. Heat Pipes -- V. Louvers -- VI. Heaters and Heater Control -- Chapter 7. Thermal Verification Tests -- I. Introduction -- II. Thermal Balance Test -- III. Testing with Temperature Margins -- IV. Typical Verification Tests -- Index -- A -- B -- C -- D -- E -- F -- G -- H -- I -- K -- L -- M -- N -- O -- P -- R -- S -- T -- V.

Sommario/riassunto

This work is about the theory and methods of controlling the temperature of a satellite. It presents satellite thermal control as an organized engineering discipline systematically derived from the principles of heat transfer. The treatment is thorough but consciously readable and tutorial requiring only basic knowledge of physics and mathematics as prerequisite.
