

1. Record Nr.	UNINA9910961926403321
Titolo	Ground water vulnerability assessment : contamination potential under conditions of uncertainty / / Committee on Techniques for Assessing Ground Water Vulnerability, Water Science and Technology Board, Commission on Geosciences, Environment, and Resources, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1993
ISBN	9786610196302 9781280196300 1280196300 9780309585088 0309585082 9780585028675 0585028672
Edizione	[1st ed.]
Descrizione fisica	1 online resource (226 p.)
Disciplina	628.1/68
Soggetti	Groundwater - Pollution Water - Pollution potential
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	GROUND WATER VULNERABILITY ASSESSMENT -- Copyright -- Preface -- Contents -- Executive Summary -- INTRODUCTION -- The Vulnerability Assessment Process -- MANAGEMENT -- APPROACHES TO VULNERABILITY ASSESSMENT -- Uncertainty in Vulnerability Assessment -- Testing and Evaluation of Vulnerability Assessments -- Computing Environments for Vulnerability Assessments -- DATA AND DATABASES -- CASE STUDIES -- RESEARCH RECOMMENDATIONS -- REFERENCE -- 1 Introduction -- PROTECTING GROUND WATER FROM FUTURE CONTAMINATION -- Ground Water Vulnerability to Contamination -- ASSESSING GROUND WATER VULNERABILITY -- Uncertainty in the Assessment Process -- Elements of Vulnerability Assessment -- Reference Location -- Specific and Intrinsic Vulnerability -- Contaminant Pathways -- Spatial Scales -- THE VULNERABILITY

ASSESSMENT PROCESS -- Case Studies -- REFERENCES -- 2  
Considerations in the Selection and Use of Vulnerability Assessments  
-- INTRODUCTION -- EXISTING AND POTENTIAL USES FOR  
VULNERABILITY ASSESSMENTS -- Policy Analysis and Development --  
Program Management -- Land Use Decisions -- Zoning and Screening  
-- Conditioning, Mitigating, and Compliance Monitoring -- Technical  
Assistance -- General Education and Awareness -- FACTORS  
AFFECTING SELECTION AND USE OF VULNERABILITY ASSESSMENTS --  
Technical Considerations -- Type and Form of Output -- Size and  
Characteristics of Assessment Area -- Availability of Data --  
Uncertainty of Results and Impact on Use -- Institutional  
Considerations -- Time Frame of a Vulnerability Assessment -- Cost  
and Commitment of Personnel and Physical Resources -- Coordination  
with Other Planning Programs and Needs -- Coordination with Other  
Agencies and Institutions -- SUMMARY -- 3 Approaches to  
Vulnerability Assessments -- INTRODUCTION -- REVIEW OF CURRENT  
APPROACHES -- Overlay and Index Methods -- Depth to Ground Water  
-- Recharge.  
Properties of the Unsaturated Zone and Aquifer Material -- Discussion  
-- Process-Based Simulation Models -- Discussion -- Statistical  
Techniques for Vulnerability Assessment -- Regionalization --  
Vulnerability Assessment -- UNCERTAINTY IN VULNERABILITY  
ASSESSMENT METHODS -- Sources of Errors -- Errors in Obtaining Data  
-- Errors Due to Natural Spatial and Temporal Variability -- Errors in  
Computerization (Digitizing) and Storage of Data -- Data Processing  
Errors -- Models and Conceptualizations -- Output and Visualization  
Errors -- Uncertainty Analyses -- Applications of FOIA to Vulnerability  
Assessment -- Uncertainty of Uncertainty Analyses -- TESTING AND  
EVALUATION OF VULNERABILITY ASSESSMENTS -- Regional-Scale  
Testing and Evaluation -- Limitations of Ground Water Quality  
Sampling -- Difficulties in Characterizing the Mobile Fraction of  
Contaminants -- Sampling Near the Water Table -- Purging and  
Pumping -- COMPUTING ENVIRONMENTS FOR VULNERABILITY  
ASSESSMENTS -- Building and Making Databases Available for  
Assessment Approaches -- Geographical Display of Assessment  
Results -- Analytical Functions -- SUMMARY -- REFERENCES -- 4 Data  
and Databases -- INTRODUCTION -- Federal Data Management  
Activities -- State and Local Data Management Activities --  
TOPOGRAPHY -- Characteristics and Availability of Data -- Discussion  
-- SOILS -- Characteristics and Availability of Data -- Geographic  
Databases -- Attribute Databases -- Site-Specific Databases --  
Discussion -- HYDROGEOLOGY -- Characteristics and Availability of  
Data -- Discussion -- WEATHER AND CLIMATE -- Characteristics and  
Availability of Data -- Discussion -- LAND USE AND LAND COVER --  
Characteristics and Availability of Data -- Discussion -- MANAGEMENT  
FACTORS -- Characteristics and Availability of Data -- National  
Resources Inventory -- Agricultural Census of 1987 -- Farm and Ranch  
Irrigation Survey.  
Pesticide Databases -- Field Level Databases -- CONCLUSION --  
REFERENCES -- 5 Case Studies -- INTRODUCTION -- IOWA --  
Introduction -- Defining the Question -- Mandate, Selection, and  
Implementation -- CAPE COD -- Introduction -- Defining the Question  
-- Selection and Implementation of Approaches -- Results -- FLORIDA  
-- Introduction -- The Hydrogeologic Setting -- Defining the Question  
-- Selecting an Approach -- Results -- THE SAN JOAQUIN VALLEY --  
Introduction -- Hydrogeologic Setting -- Defining the Question --  
Selection and Implementation of an Approach -- HAWAII --  
Introduction -- Defining the Question -- Approaches -- Results --

APPLICATION OF A VULNERABILITY INDEX FOR DECISION-MAKING AT THE NATIONAL LEVEL -- Need for a Vulnerability Index -- Description of the Vulnerability Index -- Application to Program Management -- Application to Policy Analysis and Development -- SUMMARY -- REFERENCES -- 6 Conclusions and Recommendations -- MANAGEMENT IMPLICATIONS -- APPROACHES -- DATA AND DATABASES -- RESEARCH AGENDA -- Fundamental Transport and Fate Processes -- Databases -- Geoprocessing and Display -- Assessment Methods -- Appendixes -- Appendix A Sources for Digital Resource Databases -- GENERAL SOURCE INFORMATION -- Appendix B Biographical Sketches -- COMMITTEE MEMBERS -- COMMITTEE STAFF -- Appendix C Contributors to the Committee's Effort -- Index.

## Sommario/riassunto

Since the need to protect ground water from pollution was recognized, researchers have made progress in understanding the vulnerability of ground water to contamination. Yet, there are substantial uncertainties in the vulnerability assessment methods now available. With a wealth of detailed information and practical advice, this volume will help decisionmakers derive the most benefit from available assessment techniques. It offers Three laws of ground water vulnerability. Six case studies of vulnerability assessment. Guidance for selecting vulnerability assessments and using the results. Reviews of the strengths and limitations of assessment methods. Information on available data bases, primarily at the federal level. This book will be indispensable to policymakers and resource managers, environmental professionals, researchers, faculty, and students involved in ground water issues, as well as investigators developing new assessment methods.
