Sommario/riassunto	The 'globalisation' concept has become ubiquitous in British politics, as

it has in many countries of the world. This exciting new book examines discourse on foreign economic policy to determine the impact of globalisation across the ideological landscape of British politics. The book critically interrogates the assumption that the idea of globalisation is derivative solely of neo-liberal ideology by profiling the discourse on globalisation of five political groups involved in making and contesting British foreign economic policy between 1997 and 2009: New Labour, International Financial Servic
