Sommario/riassunto	Following independence, most countries in Africa sought to develop, but their governments pursued policies that actually undermined their rural economies. Examining the origins of Africa's "growth tragedy," Markets and States in Tropical Africa has for decades shaped the thinking of practitioners and scholars alike. Robert H. Bates's analysis now faces a challenge, however: the revival of economic growth on the continent. In this edition, Bates provides a new preface and chapter that address the seeds of Africa's recovery and discuss the significance of

the continent's success for the arguments of this classic work.

Sommario/riassunto

The fastest growing segment of the workforce is women age sixty-five and older. *Women Still at Work* draws on national survey data and in-depth interviews to show the many reasons why women are working well past the traditional retirement age. The book is filled with profiles of real working women, with a focus on women in the professional workforce.
