

1. Record Nr.	UNINA9910792101903321
Titolo	Everyday citizenship and people with dementia / / edited by Ann-Charlotte Nedlund, Ruth Bartlett and Charlotte L. Clarke
Pubbl/distr/stampa	Edinburgh : , : Dunedin, , [2019] 2019
ISBN	1-78046-612-9 1-78046-626-9
Descrizione fisica	1 online resource (117 p.)
Collana	Policy and practice in health and social care ; ; 28
Disciplina	362.196831
Soggetti	Dementia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Everyday Citizenship and People with Dementia prioritises the ordinary lives of people with dementia, and thereby broadens the agenda towards everyday citizenship. The contributors bring to the fore the idea that a person living with dementia has multiple opinions, identities and a stake in society. The notion of everyday citizenship is used to shift the focus away from care settings and diagnostic and post-diagnostic support - all of which are important, of course - to the 'normal' everyday routines and settings of a person's life. The notion of citizenship is mobilised within a range of contexts from dealing with the welfare system to living and being a part of a neighbourhood. Each chapter focuses on everyday citizenship from the perspective of people living with dementia and shows how citizenship is a necessity for a vibrant, inclusive society. The discussion is informed by empirically based work and authored by experts from different parts of the world, including Canadian and Scots citizens who are living with dementia. The stress, throughout the book, is that the everyday and mundane is not only important in a practical sense but also in a political one. The book is thus for all interested in current debates about equality and the rights of people with dementia.

Autore	Monmonier Mark S
Titolo	Coast lines : how mapmakers frame the world and chart environmental change / / Mark Monmonier
Pubbl/distr/stampa	Chicago, : University of Chicago Press, 2008
ISBN	9786611965990 9781281965998 1281965995 9780226534046 0226534049
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xiii, 228 pages) : illustrations, maps
Classificazione	RB 10223
Disciplina	912/.1946
Soggetti	Coastal mapping Environmental monitoring
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 193-214) and index.
Nota di contenuto	Frontmatter -- CONTENTS -- PREFACE AND ACKNOWLEDGMENTS -- ONE. DEPICTION AND MEASUREMENT -- TWO. DEFINITIONS AND DELINEATIONS -- THREE. NEW WORLDS AND FICTITIOUS ISLANDS -- FOUR. TRIANGLES AND TOPOGRAPHY -- FIVE. OVERHEAD IMAGING -- SIX. ELECTRONIC CHARTS AND PRECISE POSITIONING -- SEVEN. GLOBAL SHORELINES -- EIGHT. BASELINES AND OFFSHORE BORDERS -- NINE. CALIBRATING CATASTROPHE -- TEN. RISING SEAS, ERODING SURGE -- ELEVEN. CLOSE-UPS AND COMPLEXITY -- TWELVE. EPILOGUE -- NOTES -- BIBLIOGRAPHY -- INDEX
Sommario/riassunto	In the next century, sea levels are predicted to rise at unprecedented rates, causing flooding around the world, from the islands of Malaysia and the canals of Venice to the coasts of Florida and California. These rising water levels pose serious challenges to all aspects of coastal existence-chiefly economic, residential, and environmental-as well as to the cartographic definition and mapping of coasts. It is this facet of coastal life that Mark Monmonier tackles in <i>Coast Lines</i> . Setting sail on a journey across shifting landscapes, cartographic technology, and climate change, Monmonier reveals that coastlines are as much a set of

ideas, assumptions, and societal beliefs as they are solid black lines on maps. Whether for sailing charts or property maps, Monmonier shows, coastlines challenge mapmakers to capture on paper a highly irregular land-water boundary perturbed by tides and storms and complicated by rocks, wrecks, and shoals. *Coast Lines* is peppered with captivating anecdotes about the frustrating effort to expunge fictitious islands from nautical charts, the tricky measurement of a coastline's length, and the contentious notions of beachfront property and public access. Combing maritime history and the history of technology, *Coast Lines* charts the historical progression from offshore sketches to satellite images and explores the societal impact of coastal cartography on everything from global warming to homeland security. Returning to the form of his celebrated *Air Apparent*, Monmonier ably renders the topic of coastal cartography accessible to both general readers and historians of science, technology, and maritime studies. In the post-Katrina era, when the map of entire regions can be redrawn by a single natural event, the issues he raises are more important than ever.
