

1. Record Nr.	UNINA9910466490903321
Autore	Musselli Irene
Titolo	Agriculture, price stabilisation and trade rules : a principled approach / / by Irene Musselli
Pubbl/distr/stampa	Leiden, the Netherlands ; ; Boston, [Massachusetts] : , : Brill Nijhoff, , 2017 ©2017
ISBN	90-04-35054-3
Descrizione fisica	1 online resource (348 pages) : illustrations
Collana	World Trade Institute Advanced Studies, , 2405-9331 ; ; Volume 3
Disciplina	338.13
Soggetti	Foreign trade regulation Agricultural prices - Government policy Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Based on author's thesis (Doctoral - Faculty of Law of the University of Bern, within the program of the World Trade Institute), 2016.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Setting the Stage: Key Concepts and Issues -- A Historical Review of Multilaterally Agreed Criteria for Action on Commodity Prices (1947–1989) -- From Market Intervention to Free Trade and Back to Managed Trade? (1989–2011) -- Beyond the Impasse: Towards a New Normative Approach -- Conclusion.
Sommario/riassunto	In Agriculture, Price Stabilisation and Trade Rules , Irene Musselli offers a comprehensive doctrinal and historical analysis of stabilisation tools and approaches in agriculture. Using her extensive practical experience in the field, she takes up the interface of the tools discussed with trade rules and offers the first comprehensive analysis of WTO rules from the perspective of stabilisation policies. This volume offers a fresh look at the tool box of managed trade in agricultural commodities and develops new and refined solutions that take into account the legal role of equity and of graduation. Musselli offers new insights and is able to invigorate a debate caught in overly ideological entanglements between market oriented and interventionist schools.

ISBN	981-4551-25-2
Descrizione fisica	1 online resource (viii, 417 pages) : illustrations
Collana	Gale eBooks
Disciplina	514/.24
Soggetti	Homotopy theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	<p>Preface; Contents; 1. Chance and Challenge: A Brief Review of Homotopy Analysis Method; 1.1. Background; 1.2. A brief history of the HAM; 1.3. Some advances of the HAM; 1.3.1. Generalized zeroth-order deformation equation; 1.3.2. Spectral HAM and complicated auxiliary operator; 1.3.3. Predictor HAM and multiple solutions; 1.3.4. Convergence condition and HAM-based software; 1.4. Relationships to other methods; 1.5. Chance and challenge: some suggested problems; 1.5.1. Periodic solutions of chaotic dynamic systems; 1.5.2. Periodic orbits of Newtonian three-body problem</p> <p>1.5.3. Viscous flow past a sphere1.5.4. Viscous flow past a cylinder; 1.5.5. Nonlinear water waves; Acknowledgment; References; 2. Predictor Homotopy Analysis Method (PHAM); 2.1. Preliminaries; 2.2. Description of the method; 2.2.1. Zeroth-order deformation equation; 2.2.2. High-order deformation equation; 2.2.3. Prediction of the multiple solutions; 2.3. Convergence analysis; 2.4. Some illustrative models; 2.4.1. Nonlinear problem arising in heat transfer; 2.4.1.1. Model and exact solutions; 2.4.1.2. Prediction of dual solutions by the rule of multiplicity of solutions</p> <p>2.4.1.3. Effective calculation of the two branches of solution2.4.2. Strongly nonlinear Bratu's equation; 2.4.2.1. Problem and exact solutions; 2.4.2.2. Prediction of multiple solutions by the rule of multiplicity of solutions; 2.4.2.3. Effective calculation of the two branches of solution; 2.4.3. Nonlinear reaction-diffusion model;</p>

2.4.3.1. Equation and exact solutions; 2.4.3.2. Prediction of multiple solutions by the rule of multiplicity of solutions; 2.4.3.3. Calculation of the two branches of solution; 2.4.4. Mixed convection flows in a vertical channel
2.4.4.1. Prediction of dual solutions by the rule of multiplicity of solutions
2.4.4.2. Effective calculation of the two branches of solution;
2.4.4.3. Further results; 2.5. Concluding remarks; References; 3. Spectral Homotopy Analysis Method for Nonlinear Boundary Value Problems; 3.1. Introduction; 3.2. Basic ideas of the spectral homotopy analysis method; 3.3. Some applications of the spectral homotopy analysis method; 3.3.1. Falkner-Skan boundary layer flow; 3.3.2. Eigenvalue problems; 3.3.3. Boundary value problems with multiple solutions; 3.3.4. Coupled nonlinear boundary value equations

Sommario/riassunto

Unlike other analytic techniques, the Homotopy Analysis Method (HAM) is independent of small/large physical parameters. Besides, it provides great freedom to choose equation type and solution expression of related linear high-order approximation equations. The HAM provides a simple way to guarantee the convergence of solution series. Such uniqueness differentiates the HAM from all other analytic approximation methods. In addition, the HAM can be applied to solve some challenging problems with high nonlinearity. This book, edited by the pioneer and founder of the HAM, describes the current adva

Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	1. The critics -- 2. Trade flows and their consequences -- 3. Factor markets : labor -- 4. Factor markets capital -- 5. Macroeconomics.
Sommario/riassunto	People passionately disagree about the nature of the globalization process. The failure of both the 1999 and 2003 World Trade Organization's (WTO) ministerial conferences in Seattle and Cancun, respectively, have highlighted the tensions among official, international organizations like the WTO, the International Monetary Fund (IMF), the World Bank, nongovernmental and private sector organizations, and some developing country governments. These tensions are commonly attributed to longstanding disagreements over such issues as labor rights, environmental standards, and tariff-cutting rules. In addition, developing countries are increasingly resentful of the burdens of adjustment placed on them that they argue are not matched by

commensurate commitments from developed countries. *Challenges to Globalization* evaluates the arguments of pro-globalists and anti-globalists regarding issues such as globalization's relationship to democracy, its impact on the environment and on labor markets including the brain drain, sweat shop labor, wage levels, and changes in production processes, and the associated expansion of trade and its effects on prices. Baldwin, Winters, and the contributors to this volume look at multinational firms, foreign investment, and mergers and acquisitions and present surprising findings that often run counter to the claim that multinational firms primarily seek countries with low wage labor. The book closes with papers on financial opening and on the relationship between international economic policies and national economic growth rates.
