#### Sommario/riassunto

Researching Enterprise Development is written by the key researchers of a large Norwegian Action Research program on enterprise development (Enterprise Development 2000). This book tells the stories of how the seven participating modules were developed, created and sustained as Action Research activities. Based on these stories, reflection on a broader analysis of core issues of the program are given on the following topics: the processes within the program and changing models for leadership how research groups become proficient as action researchers local research as networking with the regional business community enhancing the innovation capacity of participating companies participation and democratic processes in enterprise development The reflections and stories provide detailed accounts of how this Action Research program was developed and ample ideas on how Action Research modules can be implemented for other enterprise development projects. The book is preceded by Work Organisation and Europe as a Development Coalition (edited by Richard Ennals and Bjorn Gustavsen, 1999), and the results of the ED 2000 project are explained in Creating Connectedness (edited by Bjorn Gustavsen, Hakon Finne and Bo Oscarsson, 2001).

Sommario/riassunto

The ambition is of this volume to study the role censorship played in the intellectual culture of the seventeenth and eighteenth centuries, how it was implemented, and how it affected the development philosophy and literary writing. It contains contributions by intellectual historians, philosophers and literary theorists. The first section studies how Enlightenment thinkers were submitted to censorship, in particular the German Spinozists, Pierre Bayle, and the French Encylopedists. The second section on the institutional aspects of censorship contains an analysis of the breakdown of censorship in England around 1640 and a discussion of the impact of censorship on philosophy in the Netherlands. The final section studies the stand three Enlightenment thinkers, namely John Toland, Denis Diderot, and G. W. Leibniz, took on the issue of censorship.
