Sommario/riassunto	This is the third volume in the series Contemporary Freud: Turning Points and Critical Issues, published for the International Psychoanalytical Association. Each volume presents a classic essay by Freud with commentaries by prominent psychoanalytic teachers and

analysts from different theoretical backgrounds and geographical locations. "Observations on Transference-Love" may have been inspired, say the contributors, by the unfortunate emotional involvements of two of Freud's colleagues with female patients. In his paper, Freud speaks of the inevitability of "transference-love" in every well-conducted analysis, its important therapeutic functions, and its potential hazards. Transference love is discussed in the larger context of transference in general. The essays illuminate a persistent problem in all modalities of psychotherapy: unfortunate, often tragic, enactments of erotic transference and countertransference. This volume also includes the original essay by Freud.
